Accelerate sales and improve customer experience Every day, most working professionals entrust their most important messages to a form of communication that doesn't build trust, provide

differentiation, or communicate clearly enough. It's easy to point to the sheer volume of emails, text messages, voicemails, and even social messaging as the problem that reduces our reply rates and diminishes our effectiveness. But the faceless nature of that communication is also to blame. Rehumanize Your Business explains how to dramatically improve relationships and results with your customers, prospects, employees, and recruits by adding personal videos to emails, text messages, and

---

social messages. It explains the what, why, and how behind this new movement toward simple, authentic videos—and when to replace some of your plain, typed-out communication with webcam and smartphone recordings. • Restore face-to-face communication for clarity and connection • Add a personal, human touch to your emails and other messages • Meet people who 've sent thousands of videos • Learn to implement your own video habit in an easy, time-saving way • Boost your replies, appointments, conversion, referrals, and results dramatically If you 're ready to influence, teach, sell, or serve in a more personal way, **Rehumanize Your Business** is your guide.

**Cool Mac Sounds** I.B. Tauris

This is one of the most significant military books of the twentieth century. By an outstanding soldier of

independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Crowood Press  
The Cooke and Hood families have been at each other's throats since the Spanish Main days. The latest chapter in their piratic rivalry takes place in 2004, when an old treasure map turns up. None of this seems to matter to Morgan Cooke, a cowardly, landlubbing accountant entirely ignorant of his heritage until his estranged father, Isaac, in need of crewmen, kidnaps him and thrusts him into the fray. When Morgan

---

wakes up on a boat in the middle of the Caribbean, he learns that piracy still flourishes, albeit with far more discretion than in the old days--pirates disguise their fast boats as shrimpers or tugs--but with no less bloodshed. Judging even a shot at riches vastly preferable to a return to his lonely, fluorescent-lit work station existence, Morgan pierces his ear, dons the eye patch and peg leg, and set sail for glorious adventure.

Volume 2 of the book ' Sand Dunes of the Northern Hemisphere ' is sub-titled Characteristics, Dynamics and Provenance of Sand Dunes in the Northern Hemisphere. It brings together a vast body of information and insight into sand dune and desert systems from North Asia, Central

Asia, North Africa and the Middle East. Chapters from the Russian Federation include studies on dune systems within the permafrost zone and there is a case study from temperate zone dune system in coastal Japan. Volume 2: Characteristics, Dynamics and Provenance of Sand Dunes in the Northern Hemisphere of 16 chapters in three Parts, focusses on Saharan Africa, Egypt, and Middle East and gives attention to sand mobility and encroachment with case studies from a number of countries where these matters are of concern. We also include chapters on the

---

remote dunes in the permafrost zone and in the hyper-arid deserts of Iran. Case studies are used to highlight the characteristics of dunes and their interaction with humans in several widely divergent settings. Volume 2 concludes with some musing on the value of study of the past as key to the future and speculates on what the future might hold in the light of a warmer and drier Earth and a rise in sea level that threaten large tracts of low-lying land with marine incursions and destruction from storm surge. PART 4 Sand Mobility and Encroachment The seven chapters in this Part examine the real-

world impact of sand encroachment and dune migration on people and their economic activities and the health, welfare and financial implications related to destruction of infrastructure, including human habitations. PART 5 Sand Dune Landscapes Distribution, Formation and Management Seven Case studies from several geographic regions in Africa, the Middle East, north-east Asia are presented here to demonstrate the underlying mechanisms in dune formation and the diverse approaches to their management. Human impacts such as sand mining, tourism development, combine

---

with natural forces like climate variability to challenge the realization of an optimum management strategy. PART 6 Concluding Thoughts: Coping with an Unknown Future from a Little-known Past The two chapters in Part 6 have special roles. We are privileged to publish new research findings that are summarized here in Chapter 38 from extensive and detailed work conducted in the Kyzyl Kum, and Karakum sand seas of Central Asia. There is a strong belief that further study of the little-known past such as revealed in this study could unlock clues as to what a

future Earth might look like. This leads on to speculation in Chapter 39 about the implications of what we already know about global change (not only climate change) and the impact of the Anthropocene on the dune systems, both inland and coastal. Sea level rise, marine incursions and an increase in extreme weather events will affect dune systems and sand seas on the Northern Hemisphere (and beyond).
