Nationalism, nation-building and 'defensive modernisation' were the main themes of the 'cultural revolution' underpinning the totalitarian and secular regimes of Ataturk and Reza Shah which replaced the traditional Qajar state of Iran and the long-declining Ottoman Empire. The authors trace the emergence of Ataturk and Reza Shah through the constitutional revolutions in Iran and the Ottoman Empire and the introduction of European social models, the establishment of dictatorship and of secularist reforms resulting in both cases in totalitarian, nationalist, and quasi-westernised states, and the personality cult of the leader. The legacy of both was a chasm between the elite and the masses and provided the seeding of an Islamic mass-movement.

It is commonly believed that populist politics and social media pose a serious threat to our concept of truth.

Philosophical pragmatists, who are typically thought to regard truth as merely that which is 'helpful' for us to believe, are sometimes blamed for providing the theoretical basis for the phenomenon of 'post-truth'. In this book, Sami

Pihlström develops a pragmatist account of truth and truth-seeking based on

the ideas of William James, and defends a thoroughly pragmatist view of humanism which gives space for a sincere search for truth. By elaborating on James's pragmatism and the 'will to believe' strategy in the philosophy of religion, Pihlström argues for a Kantian-inspired transcendental articulation of pragmatism that recognizes irreducible normativity as a constitutive feature of our practices of pursuing the truth. James himself thereby emerges as a deeply Kantian thinker.

Sidetracked Home Executives(TM) Ballantine Books  
In this groundbreaking book, parenting expert and acclaimed author of the bestselling book *Simplicity Parenting* Kim John Payne, M.Ed., flips the script on children's challenging or defiant behavior and lays out an elegantly simple plan to support

---

parents in establishing loving, age-sensitive boundaries that help children feel safe and settled. In short: What looks like misbehavior is actually your children's signal that they're feeling lost, that they are trying to find direction and looking to you to guide them back on course. Payne gives parents heartwarming help and encouragement by combining astute observations with sensitive and often funny stories from his long career as a parent educator and a school and family counselor. In accessible language, he explains the relevance of current brain- and child-development studies to day-to-day parenting. Breaking the continuum of childhood into three stages, Payne says that parents need to play three different roles, each corresponding to one of those stages, to help steer children through their emotional growth and inevitable challenging times:

- The Governor, who is comfortably and firmly in charge—setting limits and making decisions for the early

years up to around the age of eight

- The Gardener, who watches for emotional growth and makes decisions based on careful listening, assisting tweens in making plans that take the whole family's needs into account
- The Guide, who is both a sounding board and moral compass for emerging adults, helping teens build a sense of their life's direction as a way to influence healthy decision making

Practical and rooted in common sense, *The Soul of Discipline* gives parents permission to be warm and nurturing but also calm and firm (not overreactive). It gives clear, doable strategies to get things back on track for parents who sense that their children's behavior has fallen into a troubling pattern. And best of all, it provides healthy direction to the entire family so parents can spend less time and energy on outmoded, punitive discipline and more on connecting with and enjoying their kids. Advance praise for *The Soul of Discipline*

“*The Soul of Discipline* offers practical tools for helping parents implement discipline that's

---

respectful and effective, but the book is so much more. Kim John Payne offers a framework to guide parents in making decisions about why, when, and how to hold tighter reins as we build skills in our children, and why, when, and how to loosen the reins as we scaffold freedom. ” —Tina Payne Bryson, Ph.D., co-author of No-Drama Discipline “ This book gets deep inside the challenge of getting along with children and teens and thinks deeply about what they need from us to become strong and self-managing. It elevates discipline to what it should be—a caring process of helping kids orient to the world and live in it happily and well. ” —Steve Biddulph, author of The New Manhood “ Kim Payne provides a useful model for choosing our parenting stance—Governor, Gardener, or Guide—depending on the situation. Most powerfully, Payne begins with the radical view that children are not disobedient but rather disoriented. The upshot of this shift in perspective is that discipline is about helping children orient themselves

effectively, not about controlling or chastising. ” —Lawrence J. Cohen, Ph.D., author of Playful Parenting

Accelerate sales and improve customer experience Every day, most working professionals entrust their most important messages to a form of communication that doesn't build trust, provide differentiation, or communicate clearly enough. It's easy to point to the sheer volume of emails, text messages, voicemails, and even social messaging as the problem that reduces our reply rates and diminishes our effectiveness. Volume 2 of the book ' Sand Dunes of the Northern Hemisphere ' is sub-titled Characteristics, Dynamics and Provenance of Sand Dunes in the

---

Northern Hemisphere. It brings together a vast body of information and insight into sand dune and desert systems from North Asia, Central Asia, North Africa and the Middle East. Chapters from the Russian Federation include studies on dune systems within the permafrost zone and there is a case study from temperate zone dune system in coastal Japan. Volume 2: Characteristics, Dynamics and Provenance of Sand Dunes in the Northern Hemisphere of 16 chapters in three Parts, focusses on Saharan Africa, Egypt, and Middle East and gives attention to sand mobility and encroachment with case studies from a number of countries where these matters are of concern. We also include chapters on the remote dunes in the permafrost zone and in the hyper-arid deserts of Iran. Case studies are used to highlight the characteristics of dunes and their interaction with humans in several widely divergent settings. Volume 2 concludes with some musing on the value of study of the past as key to the future and

speculates on what the future might hold in the light of a warmer and drier Earth and a rise in sea level that threaten large tracts of low-lying land with marine incursions and destruction from storm surge. PART 4 Sand Mobility and Encroachment The seven chapters in this Part examine the real-world impact of sand encroachment and dune migration on people and their economic activities and the health, welfare and financial implications related to destruction of infrastructure, including human habitations. PART 5 Sand Dune Landscapes Distribution, Formation and Management Seven Case studies from several geographic regions in Africa, the Middle East, north-east Asia are presented here to demonstrate the underlying mechanisms in dune formation and the diverse approaches to their management. Human impacts such as sand mining, tourism development, combine with natural forces like climate variability to challenge the realization of an optimum management strategy. PART 6

---

Concluding Thoughts: Coping with an Unknown Future from a Little-known Past The two chapters in Part 6 have special roles. We are privileged to publish new research findings that are summarized here in Chapter 38 from extensive and detailed work conducted in the Kyzyl Kum, and Karakum sand seas of Central Asia. There is a strong belief that further study of the little-known past such as revealed in this study could unlock clues as to what a future Earth might look like. This leads on to speculation in Chapter 39 about the implications of what we already know about global change (not only climate change) and the impact of the Anthropocene on the dune systems, both inland and coastal. Sea level rise, marine incursions and an increase in extreme weather events will affect dune systems and sand seas on the Northern Hemisphere (and beyond).
