Londoniana - Kamehameha Schools Press
The definitive story of a game so great, even the Cold War couldn't stop it Tetris is perhaps the most instantly recognizable, popular video game ever made. But how did an obscure Soviet programmer, working on frail, antiquated computers, create a product which has now earned nearly 1 billion in sales? How did a makeshift game turn into a worldwide sensation, which has been displayed at the Museum of Modern Art, inspired a big-budget sci-fi movie, and been played in outer space? A quiet but brilliant young man, Alexey Pajitnov had long nurtured a love for the obscure puzzle game pentominoes, and became obsessed with turning it into a computer game. Little did he know that the project that he labored on alone, hour after hour, would soon become the most addictive game ever made. In this

fast-paced business story, reporter Dan Ackerman reveals how Tetris became one of the world's first viral hits, passed from player to player, eventually breaking through the Iron Curtain into the West. British, American, and Japanese moguls waged a bitter fight over the rights, sending their fixers racing around the globe to secure backroom deals, while a secretive Soviet organization named ELORG chased down the game's growing global profits. The Tetris Effect is an homage to both creator and creation, and a must-read for anyone who's ever played the game—which is to say everyone.

Nineteenth Century Collections Online: European Literature, 1790-1840: The Corvey Collection includes the full-text of more than 9,500 English, French and German titles. The collection is sourced from the remarkable library of Victor Amadeus, whose Castle Corvey collection was one of the most spectacular discoveries of the late 1970s. The Corvey Collection comprises one of the most important collections of Romantic era writing in

existence anywhere -- including fiction, short prose, dramatic works, poetry, and more -- with a focus on especially difficult-to-find works by lesser-known, historically neglected writers. The Corvey library was built during the last half of the 19th century by Victor and his wife Elise, both bibliophiles with varied interests. The collection thus contains everything from novels and short stories to belles lettres and more populist works, and includes many exceedingly rare works not available in any other collection from the period. These invaluable, sometimes previously unknown works are of particular interest to scholars and researchers. European Literature, 1790-1840: The Corvey Collection includes: * Novels and Gothic Novels * Short Stories * Belles-Lettres * Short Prose Forms * Dramatic Works * Poetry * Anthologies * And more Selected with the guidance of an international team of expert advisors, these primary sources are invaluable for a wide range of academic disciplines and areas of study, providing never before possible research opportunities for one of the most studied historical periods. Theology, Disability and Sport

Independently Published

This delightful introduction to drawing faces completely demystifies the drawing process. It shows how images can be built up easily, from initial geometric shapes right through to the finished faces. Susie Hodge includes a good selection of head-and-shoulder portraits in this book including couples, children, babies and older people in a variety of poses, and showing a range of expressions. She uses a helpful two-colour method that clearly shows every line and curve of the step-by-step pictures. Even absolute beginners will find themselves creating great drawings when they use this book and there is much to inspire more experienced artists too. An invaluable guide for anyone interested in this subject.

Conduction of Heat in Solids

National Geographic Books

This ground-breaking book provides fascinating insights into the fast-emerging body of research that explores the relationship between sport, theology and disability within a social justice framework. In the shadow of two major sport-faith events that fore-fronted the theology of disability sport, the Vatican's international conference—Sport at the Service of Humanity and the Inaugural Global Congress on Sports and Christianity York St John University, UK, at which Dr Brian Brock led a thematic strand on the topic—this book provides a foundation for further research and practice. This

text is a timely and important synthesis of ideas that have emerged in two previously distinct areas of research: (i) 'disability sport' and (ii) the 'theology of disability'. Examples of subjects addressed in this text include: elite physical disability sport—Paralympics; intellectual disability sport—Special Olympics; equestrian sport; church, sport and disability, and; theologies of embodiment, competition and mercy. This book, written by leaders in their respective fields, begins a critical conversation on these topics, and many others, for both researchers and practitioners. The chapters originally published in the *Journal of Disability and Religion and Quest*.

Goodbye, Mr Hollywood Move Me

British Generals in Blair's Wars is based on a series of high profile seminars held in Oxford in which senior British officers, predominantly from the army, reflect on their experience of campaigning. The chapters embrace all the UK's major operations since the end of the Cold War, but they focus particularly on Iraq and Afghanistan. As personal testimonies, they capture the immediacy of the authors' thoughts at the time, and show how the ideas of a generation of senior British officers developed in a period of rapid change, against a background of intense political controversy and some popular unease. The armed forces were struggling to revise their Cold War concepts and doctrines, and to find the best ways to meet the demands placed upon them by their

political leaders in what was seen to be a 'New World Order'. It was a time when relations between the Government of the day and the armed services came under close scrutiny, and when the affection of the British public for its forces seemed to grow with the difficulty of their operational tasks. This is a truly unique and invaluable book. For the first time, we are offered first-hand testimony about Britain's involvement in recent campaigns by senior participants. In addition to touching on themes like civilian-military relations, the operational direction of war and relationships with allies, these eyewitness accounts give a real sense of how the character of a war changes even as it is being fought. It will be essential reading for those in military academies and staff colleges, not only in Britain but throughout NATO, and especially in the USA. It also has profound policy implications, as both the UK and NATO more generally reassess their strategies and the value of intervention operations. It will also become a primary source for historians and students of the wars, in Iraq and Afghanistan in particular.

How to Paint Colour & Light in Watercolour
Garnsey Press

In the fall of 1930, David Packard left his hometown of Pueblo, Colorado, to enroll at Stanford University, where he befriended another freshman, Bill Hewlett. After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has produced thousands of innovative products for millions of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard and Hewlett wanted more than profits, revenue growth and a constant stream of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the

world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago.

Tantalizing suspense meets sweet romance in this fast-paced novel that's part of the Hawaii Billionaire Romance Series by Bestselling Authors Jennifer Youngblood and Sandra Poole. Artist Liam Barclay has spent the past few years, living the carefree life of a bachelor, playing the field and soaking up the sun in beautiful Oahu. Until a startling heartbreak awakens him to a sobering realization--he's in love with Maurie, his best friend and business partner. There's only one problem--she recently got engaged. Maurie Bradshaw has loved Liam

for years, but fears he's incapable of committing to a serious relationship. Tired of putting her life on hold and waiting for something that might never be, Maurie accepts a marriage proposal from Cooper Manning, a handsome art distributor, who's an all-around great guy. Tormented by the knowledge that he's on the brink of losing the love of his life, Liam sets out to win Maurie's heart. He becomes increasingly suspicious of Cooper, and suspects that he's not what he's making himself out to be. Liam does some investigating and uncovers dark secrets, which put him and Maurie at risk. As events climax to a heart-pounding frenzy, Liam must fight to protect the woman he loves, while trying to convince her that his heart is true. Will Liam and Maurie be able to put aside the prejudices of the past, or is their love doomed to crash and disintegrate on the rocks?
