The 10th Anniversary Edition of 'The Divine

Code', now in a beautiful 2-volume set, is ground-breaking in its scope. From history to prophecy, from apologetics to politics, numbers are everywhere but not clearly understood. Steve Cioccolanti has expanded this study of the meaning of numbers to include Donald Trump, Jared Kushner, Benjamin Netanyahu, Kim Clement, Osama bin Laden, the Third Temple, the 7 Noahide Laws, World War III, and much more. That is why it is 'A Prophetic Encyclopedia of Numbers.' 'The Divine Code' is a carefully researched exploration into the meaning of numbers, codes, cycles and patterns found in Scripture, nature, history, and prophecy. It demystifies familiar numbers like 7, 13, 666 and illuminates lesser known ones like 17, 58 and 708. Years of research and revelation have crafted this spiritual magnum opus that you will find an easy read and a joy to keep. Thought-provoking and highly practical, 'The Divine Code' is brimming with lively topics such as God, angels, demons, healing, dreams, different personalities, and end time prophecy. As you read it, you will fall in love with the Creator of Numbers. Let the Spirit of the Lord show you how to apply numbers to find meaning in life, fulfill your purpose, and prepare for eternity. Pick a chapter and you will find a surprising nugget of truth. As one reviewer raved, "This is the Bible of Numbers." Volume I contains the number range 1 to 25. Volume II contains the number range 26 to 1000. "The Divine Code...is an excellent reference book that is extremely informative, inspirational and practical in every way...This excellent book has reconciled the extremes in doctrines and practices we see all around us, and brings forth the proper balanced Biblical perspective." --PASTOR DENNIS BALCOMBE, Founder of Revival Chinese Ministries International, Missionary to Hong Kong since 1969 "Bible Numerics is a subject that will never be exhausted. The Divine Code by Steve Cioccolanti certainly adds to this amazing and fascinating subject." --KEVIN CONNER, Internationally-Recognized Theologian and Author "There is NO OTHER BOOK like 'The Divine Code'...Pastor Cioccolanti is the

first pastor I know to highlight God's glory in the Bible through numbers in an entertaining way. I don't think Christians appreciate the importance of numbers. They are afraid that they may be dabbling in Kabbalah or the occult, so this book is ground-breaking in educating people that God created numbers to glorify Him."--LORILYN ROBERTS, Award-Winning Christian Author

In the second half of the twentieth century, studies in Chinese painting history have been greatly aided by several major lists of Chinese artists and their works. Published between 1956 and 1980, these lists were limited to Imperial China. The current index covers the period from 1912 to around 1980.

It includes the names of approximately 3,500 traditional-style artists along with lists of their works, reproduced in some 264 monographs, books, journals, and catalogs published from the 1920s to around 1980.

With a few exceptions, artists working after 1949 outside continental China are excluded.

Revised Edition, 1998; first published by the Asian Studies Program, University of Oregon, 1984.

In the fall of 1930, David Packard left his hometown of Pueblo, Colorado, to enroll at Stanford University, where he befriended another freshman, Bill Hewlett. After graduation, Hewlett and Packard decided to throw their lots in together. They tossed a coin to decide whose name should go first on the notice of incorporation, then cast about in search of products to sell. Today, the one-car garage in Palo Alto that housed their first workshop is a California historic landmark: the birthplace of Silicon Valley. And Hewlett-Packard has produced thousands of innovative products for millions of customers throughout the world. Their little company employs 98,400 people and boasts constantly increasing sales that reached \$25 billion in 1994. While there are many successful companies, there is only one Hewlett-Packard, because from the very beginning, Hewlett and Packard had a way of doing things that was contrary to the prevailing management strategies. In defining the objectives for their company, Packard and Hewlett wanted more than profits, revenue growth and a constant stream of new, happy customers. Hewlett-Packard's success owes a great deal to many factors, including openness to change, an unrelenting will to win, the virtue of sustained hard work and a company-wide commitment to community involvement. As a result, HP now is universally acclaimed as the world's most admired technology company; its wildly successful approach to business has been immortalized as The HP Way. In this book, David Packard tells the simple yet extraordinary story of his life's work and of the truly exceptional company that he and Bill Hewlett started in a garage 55 years ago.

Approaching his middle forties, Gavin Boyter wondered what his life was all about. A Scot living in London, single and with no kids, he was living for the job and the dwindling hope of a career in film. He had been a club runner all his life, pretty good but not at the front all that often. He was what he called an ordinary runner and he came to wonder just what an ordinary runner might be capable of. How about John O'Groats to Land's End, the longest linear run in Britain, and how about making a film of it? And how about writing a book? As usual, Gavin was neither the first nor the quickest but Downhill from Here is his real triumph, written in such an engaging and witty voice the reader accompanies him every step of the way.
