“ [Le Carr é ’ s] novels are so brilliant because they ’ re emotionally and psychologically absolutely true, but of course they ’ re novels. ”
—New York Times Book Review A thrilling tale for our times from the undisputed master of the spy genre Nat, a 47 year-old veteran of Britain ’ s Secret Intelligence Service, believes his years as an agent runner are over. He is back in London with his wife, the long-suffering Prue. But with the growing threat from Moscow Centre, the office has one more job for him. Nat is to take over The Haven, a defunct substation of London General with a rag-tag band of spies. The only bright light on the team is young Florence, who has her eye on Russia Department and a Ukrainian oligarch with a finger in the Russia pie. Nat is not only a spy, he is a passionate badminton player. His regular Monday evening opponent is half his age: the introspective and solitary Ed. Ed hates Brexit, hates Trump and hates his job at some soulless media agency. And it is Ed, of all unlikely people, who will take Prue, Florence and Nat himself down the path of political anger that will ensnare them all. Agent Running in the Field is a chilling portrait of our time, now heartbreaking, now darkly humorous, told to us with unflagging tension by the greatest chronicler of our age.

A business history of the software industry from the days of custom programming to the age of mass-market software and video games. From its first glimmerings in the 1950s, the software industry has evolved to become the fourth largest industrial sector of the US economy. Starting with a handful of software contractors who produced specialized programs for the few existing machines, the industry grew to include producers of corporate software packages and then makers of mass-market products and recreational software. This book tells the story of each of these types of firm, focusing on the products they developed, the business models they followed, and the markets they served. By describing the breadth of this industry, Martin Campbell-Kelly

corrects the popular misconception that one firm is at the center of the software universe. He also tells the story of lucrative software products such as IBM's CICS and SAP's R/3, which, though little known to the general public, lie at the heart of today's information infrastructure. With its wealth of industry data and its thoughtful judgments, this book will become a starting point for all future investigations of this fundamental component of computer history.

#1 NEW YORK TIMES BESTSELLER The undisputed master returns with his first Smiley novel in more than twenty-five years--a #1 New York Times bestseller and ideal holiday gift. Peter Guillam, staunch colleague and disciple of George Smiley of the British Secret Service, otherwise known as the Circus, is living out his old age on the family farmstead on the south coast of Brittany when a letter from his old Service summons him to London. The reason? His Cold War past has come back to claim him. Intelligence operations that were once the toast of secret London, and involved such characters as Alec Leamas, Jim Prideaux, George Smiley and Peter Guillam himself, are to be scrutinized by a generation with no memory of the Cold War and no patience with its justifications. Interweaving past with present so that each may tell its own intense story, John le Carr é has spun a single plot as ingenious and thrilling as the two predecessors on which it looks back: The Spy Who Came in from the Cold and Tinker Tailor Soldier Spy. In a story resonating with tension, humor and moral ambivalence, le Carr é and his narrator Peter Guillam present the reader with a legacy of unforgettable characters old and new.
