Este manual se dirige a los profesionales relacionados con la utilización de las carretillas elevadoras. Tanto a las personas que las manejan, como a las que intervienen en su comercialización, a los que forman sobre su uso y a las que se ocupan de prevenir sus riesgos. Pero, especialmente, está pensado para quienes han de tomar decisiones sobre la adquisición y la gestión de estas máquinas, los responsables de logística de las organizaciones. Desde su primera edición en 1990, al compás de los continuos avances tecnológicos, esta sexta edición sigue siendo un título de consulta obligada, un compendio que permite considerarlo una obra absoluta, donde se reúne todo el conocimiento relativo a las carretillas elevadoras. El autor aborda todos los aspectos sobre las carretillas: ergonomía, seguridad, morfología, sistemas de elevación, implementos, accionamientos, motores, aplicaciones, mantenimiento y reparación, así como las diferentes tipologías de las máquinas y la necesaria formación para un manejo seguro. Todo ello con profusión de información técnica, cuadros, tablas, planos y despieces, fotografías y descripciones, con lógica argumental y profundidad didáctica. Vicenç Ripoll posee una amplia experiencia en marketing industrial, en formación ocupacional, en prevención de riesgos laborales y en el flujo físico de materiales con equipos autopropulsados.

Proceedings of the Royal Society of Edinburgh
This text is primarily intended for readers who have some background in chemistry and who wish to find out more about the ways in which computers and electronics are influencing the techniques of observing chemical systems, the acquisition of data, its storage, and its transmission from one location to another. Many important concepts - such as interfacing, data collection, data bases, information services and computer networks - are covered in an easily assimilated and comprehensive way.
