For scientists and engineers who are interested in learning physics. **Edexcel A2 Physics Student Unit Guide: Unit 5 Physics from Creation to Collapse** Courier Corporation In *Cultivating Genius*, Dr. Gholdy E. Muhammad presents a four-layered equity framework--one that is grounded in history and restores excellence in literacy education. This framework, which she names, *Historically Responsive Literacy*, was derived from the study of literacy development within 19th-century Black literacy societies. The framework is essential and universal for all students, especially youth of color, who traditionally have been marginalized in learning standards, school policies, and classroom practices. The equity framework will help educators teach and lead toward the following learning goals or pursuits:

Identity
Development--Helping youth to make sense of themselves and others
Skill Development--
Developing proficiencies across the academic disciplines
Intellectual Development--
Gaining knowledge and becoming smarter
Criticality--
Learning and developing the ability to read texts (including print and social contexts) to understand power, equity, and anti-oppression
When these four learning pursuits are taught together--through the *Historically Responsive Literacy Framework*, all students receive profound opportunities for personal, intellectual, and academic success. Muhammad provides probing, self-reflective questions for teachers, leaders, and teacher educators as well as sample culturally and historically responsive sample plans and text sets across grades and content areas. In this book, Muhammad presents practical approaches to cultivate the genius in students and within teachers.

Two experienced HR communications consultants show how to dramatically improve the effectiveness of every HR message. HR professionals know their programs are pivotal to organizational success, but they also know how difficult it is to communicate those programs effectively. Hampered

by legal restrictions, highly complex policies and programs, corporate politics, and old-fashioned notions about business communication, they create communications their audiences simply ignore. It needn't be that way! Alison Davis and Jane Shannon present simple, powerful principles and techniques every HR professional can use, even those who've never been comfortable as writers. Davis and Shannon demonstrate how to treat employees as customers, and use the same strategies, tools, and care your company uses to sell its products or services. The authors help HR professionals understand their customers' (and executives') needs and motivations more clearly; package information to promote faster, better decision-making; and measure their effectiveness. They present specific solutions for safely eliminating unnecessary detail and jargon; explaining benefits, pay, and policies; improving recruiting, orientation, and outplacement communications; supporting retirement planning; and improving

performance management. *Deep Work* HarperCollins
