ACDC Principles and Applications teaches learners how to apply basic laws and analysis techniques to traditional introductory circuits, as well as popular, real-world AC and DC circuits. AC/DC Principles combines standard theory of electricity with fundamentals of electronics and demonstrates electronic theory as applied to actual applications. Throughout the book, only those circuit theorems and analysis techniques that are practical and typically used in real-world circuit analysis are addressed. In addition, Kirchhoff's current law, Kirchhoff's voltage law, Thevenin's Theorem and Ohm's law are introduced to ensure that the learner has a complete understanding of each law before attempting to apply all or part to traditional series and parallel circuits.

Ballads are the kind of songs that Kara McNaughton likes best. Not the clichéd ones where a diva hits her dramatic high note or a rock band tones it down a couple of notches for the ladies, but the true ballads: the punk rocker or the country crooner reminding their listeners of the numerous ways to screw things up. In high school, Kara helped maintain the "Stories of Suburbia" notebook, which contained newspaper articles about bizarre, tragic events from suburbs all over America, and personal vignettes that Kara dubbed "ballads" written by her friends in Oak Park, just outside of Chicago. But Kara never wrote her own ballad. Before she could figure out what her song was about, she left town suddenly at the end of her junior year. Now, four years later, Kara returns to her hometown to face the music, needing to revisit the disastrous events that led to her leaving, in order to move on with her life. Intensely powerful and utterly engaging, *Ballads of Suburbia* explores the heartbreaking moments when life changes unexpectedly, and reveals the consequences of being forced to grow up too soon.

This fully-updated new edition of *Politics and the Mass Media* provides a comprehensive introduction to the role of mass communications in politics at all levels, from election campaigns, news reports and lobbying groups to the media activities of pressure groups. The relationship between politics, politicians and the media is a matter of increasingly contentious debate, as politicians' awareness of the importance of the media becomes more sophisticated amidst rapidly-advancing media technology and control. Providing a review of the nature and content of political communications and of recent theoretical developments, Negrine addresses the issues surrounding today's mass media, including cable and satellite television, investigation of the press, the relationship between the state and broadcasting institutions and the

ever-present question of whether or not Britain needs a media policy. This new edition includes: * Case studies from television and the press * Fully revised text with updated sections on the press, broadcasting and media legislation * Brand new chapters on Europe and globalisation

Only 43 per cent of U.S. construction firms remain in business after four years. Why? Inadequate management, according to the U.S. Small Business Administration. This is surprising because most construction firms are formed by ambitious construction project managers, executives and tradesmen who have excelled at what they have been doing. But as experienced as these entrepreneurs may be, they are not likely prepared to take on the full range of responsibilities forced on them in managing the business of construction in its entirety. While this business failure rate and its causes are based on U.S. experience, available data from a number of other industrialized countries shows they are similar. This book describes in detail what the business side of the construction equation requires of the construction firm owner. The contractor who quickly learns these requirements can identify and avoid or manage around the pitfalls that cause the high failure rate in our industry and put his or her construction firm on a level playing field with the best-run companies in the business. The detailed duties of the owner, whether in the U.S., U.K., Australia or Canada, are a common theme throughout the book. The author, Nick Ganaway, speaks peer-to-peer, and the book is sprinkled with supporting examples from his own experience. He is immersed in the industry and this book is "based on the things I've learned, used, and refined as a light-commercial general contractor in the course of starting and operating my own construction firm for 25 years." The contractor doing \$5 million or \$50 million or more in annual sales or the equivalent amount in other countries, or the entrepreneur who is just starting up, can use the tried and proven material in this book to build a business that is profitable, enjoyable, and enduring. Additionally, the book devotes a chapter to specializing in chain-store construction.

This publication takes an integrated approach to combating urban crime and insecurity. Favours long-term preventive measures over repressive ones, it promotes partnerships designed to tackle crime prevention on several fronts, bringing together the police, the media, schools, the business community, urban planners and local communities. The guide highlights the fact that effective crime prevention is the domain of local authorities, and finds that the consultation and participation of local inhabitants in social and environmental development schemes is particularly important, in order to promote a sense of social cohesion within the community and help to restore lost confidence in the ability of public authorities to deal with crime.

In recent decades, the importance of creative cluster development has gained increasing recognition from national and regional governments. Governments have been investing in initiatives and urban development plans that aim to create or support localized creative industries. Our understanding of creative clusters is expanded with this insightful volume, which looks at issues of governance, place-making and entrepreneurship. In addition to its theoretical contributions, the book also presents a rich range of international case studies, including, among others, an analysis of coworking spaces in Toronto, business park development in MediaCityUK and mediapark.brussels and public-private partnerships in Warsaw. Creative Cluster Development will be valuable reading for advanced students, researchers and policymakers in urban planning, regional studies, economic geography, innovation studies and the creative and cultural industries.

More than a quarter-century before September 11, 2001, the World Trade Center was immortalized by an act of unprecedented daring and beauty. In August 1974, a young Frenchman named Philippe Petit boldly—and illegally—fixed a rope between the tops of the still-young Twin Towers, a quarter mile off the ground. At daybreak, thousands of spectators gathered to watch in awe and adulation as he traversed the rope a full eight times in the course of an hour. In *Man on Wire*, Petit recounts the six years he spent preparing for this achievement. It is a fitting tribute to those lost-but-not-forgotten symbols of human aspiration—the Twin Towers.

Acclaimed restaurant critic Gael Greene dishes up a delectable memoir—complete with her favorite recipes—from a lifelong love affair with food, men, and wine. In 1968, Gael Greene became the restaurant critic of the fledgling New York magazine. Before taking the job, she'd never written a restaurant review in her life. But she was a passionate foodie, and dining in the world's great restaurants on someone else's dime was too enticing to resist. Thus began a remarkable career charting the restaurants that changed the way Americans ate, the chefs who turned cooking into an art form, and the food and wines that launched a culinary revolution. Throughout it all, Gael is convinced that food and sex are inextricably linked, and in this exuberant account of her adventures in

sensuous excess, she takes readers on a joyride from the world's best tables, to al fresco lunch with Julia Child and naughty dinners with Craig Claiborne and then to bed with the men she couldn't resist--including a porn star and two Hollywood titans. The recipes she includes reflect the decades, from childhood macaroni-and-cheese to Chocolate Wickedness. Greene's tale of pleasure and heartbreak will make you laugh. It may make you cry. It will certainly make you hungry.
