The study contrasts with most previous studies of the 'information society' - which focus on the US, Japan and the EEC. Noted scholars make contributions that fill a gap in the literature on communications policy and

communications development, in particular national and international political-economic and policy aspects. Topics such as satellites, television, computer systems and links with international communications are discussed as well as specific policy issues which have arisen in opposition to the First World's continuing media and data monopolies.

Acclaimed restaurant critic Gael Greene dishes up a delectable memoir-complete with her favorite recipes-from a lifelong love affair with food, men, and wine. In 1968, Gael Greene became the restaurant critic of the fledgling New York magazine. Before taking the job, she'd never written a restaurant review in her life. But she was a passionate foodie, and dining in the world's great restaurants on someone else's dime was too enticing to resist. Thus began a remarkable career charting the restaurants that changed the way Americans ate, the chefs who turned cooking into an art form, and the food and wines that launched a culinary revolution. Throughout it all, Gael is convinced that food and sex are inextricably linked, and in this exuberant account of her adventures in sensuous excess, she takes readers on a joyride from the world's best tables, to al fresco lunch with Julia Child and naughty dinners with Craig Claiborne and then to bed with the men she couldn't resist-including a porn star and two Hollywood titans. The recipes

she includes reflect the decades, from childhood macaroni-and-cheese to Chocolate Wickedness. Greene's tale of pleasure and heartbreak will make you laugh. It may make you cry. It will certainly make you hungry. Quicksand McGraw-Hill Humanities, Social Sciences & World Languages

Only 43 per cent of U.S. construction firms remain in business after four years. Why? Inadequate management, according to the U.S. Small Business Administration. This is surprising because most construction firms are formed by ambitious construction project managers, executives and tradesmen who have excelled at what they have been doing. But as experienced as these entrepreneurs may be, they are not likely prepared to take on the full range of responsibilities forced on them in managing the business of construction in its entirety. While this business failure rate and its causes are based on U.S. experience, available data from a number of other industrialized countries shows they are similar. This book describes in detail what the business side of the construction

equation requires of the construction firm owner. The contractor who quickly learns these requirements can identify and avoid or manage around the pitfalls that cause the high failure rate in our industry and put his or her construction firm on a level playing field with the best-run companies in the business. The detailed duties of the owner, whether in the U.S., U.K., Australia or Canada, are a common theme throughout the book. The author, Nick Ganaway, speaks peer-to-peer, and the book is sprinkled with supporting examples from his own experience. He is immersed in the industry and this book is "based on the things I've learned, used, and refined as a light-commercial general contractor in the course of starting and operating my own construction firm for 25 years." The contractor doing \$5 million or \$50 million or more in annual sales or the equivalent amount in other countries, or the entrepreneur who is just starting up, can use the tried and proven material in this book to build a business that is profitable, enjoyable, and enduring. Additionally, the book devotes a chapter to

specializing in chain-store construction. Strategic Responses to Crime MDPI Utterly original, human, and provocative--like the author herself--"Some of Me" offers a fascinating, quirky, and, above all, personal look at Isabella Rossellini--actress, model, daughter of Ingrid Bergman--illuminating her life and work in a brilliant mosaic of short takes accompanied by scores of photos.

Community Policing SAGE Publications, Incorporated The police are perhaps the most visible representation of government. They are charged with what has been characterized as an "impossible" mandate -- control and prevent crime, keep the peace, provide

public services -- and do so within the constraints of democratic principles. The police are trusted to use deadly force when it is called for and are allowed access to our homes in cases of emergency. In fact, police departments are one of the few government agencies that can be mobilized by a simple phone call, 24 hours a day, 7 days a week. They are ubiquitous within our society, but their actions are often not well understood. The Oxford Handbook of Police and Policing brings together research on the development and operation of policing in the United States and elsewhere. Accomplished policing researchers Michael D. Reisig and Robert J. Kane have assembled a cast of renowned scholars to provide an authoritative and comprehensive overview of the institution of policing. The different sections of the Handbook explore policing contexts, strategies, authority, and issues relating to race and ethnicity. The Handbook also includes reviews of the research methodologies used by policing scholars and considerations of the factors that will ultimately shape the future of policing, thus providing persuasive insights into why and how policing has developed, what it is today, and what to expect in the future. Aimed at a wide audience of scholars and students in

criminology and criminal justice, as well as literature on the subject along with more police professionals, the Handbook serves as the definitive resource for information on this important institution.
