Lim traces the complexities in construction and implementation of a school subject, namely Literature in English in Malaysia through a focused and grounded narrative where tensions regarding

identity, reader response and conceptualisations about literature play out in a postcolonial context. The book demonstrates the need to think about school subjects as abstract concepts negotiated at various levels, be it during

curriculum construction or in the classroom. These conceptualisations of the subject are further influenced by contemporary concerns and sociopolitical changes over time.

As such, the scope of this book ranges from pre-independence Malaysia (then Malaya) from the 1950s till the current phase of the subject 's development in the 21st century. The volume illustrates the complex interplay of historical, cultural, and social influences on the conceptualisation of English literature as a school subject in Malaysia. Lim traces,

examines, and interprets its development as an elective subject in the context of post-secondary Malaysian education, and engages with current trends in education such as internationalization and standardized assessment. Lim also highlights the importance of teacher and student lived experiences to argue that personal conceptualisations of the school subject are actualized and negotiated in classroom discourse. Offering unique insights into studying Literature in English in a postcolonial context, the book will appeal to researchers, students

and practitioners in the fields of history of education, curriculum reform and literature education.

“ Workers looking for more fulfilling positions should start by identifying their ikigai. ”

Business Insider

“ One of the unintended—yet positive—consequences of the [pandemic] is that it is forcing people to reevaluate their jobs, careers,

and lives. Use this time wisely, find your personal ikigai, and live your best life. ” Forbes
Find your ikigai (pronounced ee-key-guy) to live longer and bring more meaning and joy to all your days.

“ Only staying active will make you want to live a hundred years. ”

—Japanese proverb
According to the Japanese, everyone has an ikigai—a reason for living. And according to the residents of the Japanese village with the world ’ s longest-living people, finding it is the key to a happier and longer life.

Having a strong sense of

ikigai—where what you love, what you ’ re good at, what you can get paid for, and what the world needs all overlap—means that each day is infused with meaning. It ’ s the reason we get up in the morning. It ’ s also the reason many Japanese never really retire (in fact there ’ s no word in Japanese that means retire in the sense it does in English): They remain active and work at what they enjoy, because they ’ ve found a real purpose in life—the happiness of always being busy. In researching this book, the authors interviewed

the residents of the Japanese village with the highest percentage of 100-year-olds—one of the world's Blue Zones. Ikigai reveals the secrets to their longevity and happiness: how they eat, how they move, how they work, how they foster collaboration and community, and—their best-kept secret—how they find the ikigai that brings satisfaction to their lives. And it provides practical tools to help you discover your own ikigai. Because who doesn't want to find happiness in every day?
