Deceit and misrepresentation is not confined to our rulers but is also common in all endeavors - for example in the areas of Health, Education and the Legal

system - where certain individuals try to achieve supremacy.

The Autobiography of Nelson Mandela John Wiley & Sons

What is it like to be born into an extended Peranakan family that has seen better days? Besides poverty, there's strife when some don't pull together. However, I had a wise Grandma, Dad, and Aunt. Reading transported me into a world of joy, and soon I loved learning for its own sake. The Scriptures challenged me to seek the kingdom of heaven when I was at university. Why should I teach in Selangor rather than my beloved hometown, Penang? Could I rely on God? On several occasions, I realized that God blessed me just on

time! I tried to influence my students to be intrinsically motivated. I tried to nurture a passion for knowledge. Besides teaching, I researched to facilitate the learning of my students. How could I manage caring for an aging aunt, but by God's mercy? How would I cope with my health issues, uncertain if healing would come? Would all the events, and my responses to them, show that I worship an all-powerful, merciful God in whom I can trust?

Have you ever wondered why a rainbow is curved? Or why left-handers aren't extinct? How a sunflower is like a synchronised swimmer, or a lightning bolt is like a blood vessel? The answer to all these questions and more can

be summed up in one simple word: MATHS. As the inimitable Eddie Woo explains, maths is not just about numbers. Maths is about patterns, and our universe is extraordinarily patterned. With enthusiasm and wonder, Eddie is here to help us discover these patterns. With engaging clarity and entertaining anecdotes, Eddie demonstrates the intricacy of maths in all the things we love - from music in our iPods to our credit cards. Filled with humour and heart, this book will fascinate, entertain and illuminate the maths that surrounds us. This is a specially formatted fixed layout ebook that retains the look and feel of the print book. **ONGLISTED FOR THE ABIA GENERAL NON-FICTION BOOK OF THE YEAR 2019 PRAISE FOR EDDIE WOO** "I never thought I'd read a maths book cover to cover, let alone sing its praises. Eddie Woo makes maths fun, accessible and relevant. Now we can all benefit from his extraordinary

skill as a teacher." JENNY BROCKIE, journalist and TV host "Not just a great teacher, Woo's Wonderful World of Maths shows Eddie to be a storyteller too. Is there anything the Woo cannot do?"
