Moving Food and Drink Routledge

Manual handling is a major cause of injury and ill health in the workplace. To implement the European Directive on the manual handling of loads (90/269/EEC), the Manual Handling Operations Regulations 1992 (MHOR) were introduced from 1 January 1993. A first evaluation study of the impact of the Regulations in 1996 found employers had accepted the need to control risks associated with manual handling and they found the ergonomic approach adopted by the Regulations to be an appropriate means of doing this.

Managing Health and Safety Manual HandlingThis publication is aimed at employers and employees across all industries. It gives revised guidance on the Manual Handling Operations Regulations 1992.The principles of good manual handlingThis report presents the outcome of an exercise carried out to establish scientifically-based principles for manual handling training, both for conventional (two-handed, symmetrical) lifting and for non- standard lifting, where the conventional technique is inapplicableManual HandlingOffers guidance on the Manual Handling Operations Regulations 1992 as amended by the Health and Safety (Miscellaneous Amendments) Regulations 2002 ('the Regulations').New HSE Publications on Reducing Manual Handling Injuries in the Food and Drink IndustriesManual HandlingNew HSE Publications on Reducing Manual Handling Injuries in the Food and Drink IndustriesUpper Limb Disorders in the WorkplaceUpper limb disorders (ULDs) are a particular group of musculoskeletal disorders which affect the arm and neck. This revised guidance is aimed at managers with responsibility for workers who may be at risk of developing ULDs. It aims to help the reader understand the hazards and risks and how to control them. Includes: ULDs - managing the problem; risk assessment and solutions; monitoring and reviewing; medical aspects of ULDs; and legal requirements.Manual Handling Assessment Chart (Pack X 10)

is also suitable for construction courses in the UK and overseas and serves as a comprehensive reference for managers and professionals within the construction industry.

Health and Safety in Brief Routledge

An informal analysis of Health and Safety Executive (HSE) national injury statistics appeared to indicate that some foods sector industries which handled heavy loads (eg. brewing/malting) had a higher manual handling injury rate than others (eg. dairies and soft drinks). System Concepts was commissioned by HSE in May 2001 to try to verify this finding and to try to determine a statistical association between loads lifted (eg. light and heavy sacks) and manual handling injury/absence from injury, based on data from a number of food/drink company sites. It was envisaged that any information arising from such a project could be used to help encourage food and drinks companies to reduce the weight of the heavier loads used in the sector.

Manual handling National Academies Press

Manual handling accounts for some 55% of all staff injuries reported annually within the health care sector. This new guidance is aimed at helping to reduce the high incidence of injuries to staff and stresses the importance of comprehensive training for management and staff. The guidance was prepared by a Working Group of the Health and Safety Commission's Health Services Advisory Committee in the context of the forthcoming Manual Handling Operations Regulations.

Manual Handling Routledge

A leaflet that presents the Manual Assessment Handling Charts (MAC). It helps employers and safety representatives in carrying out a manual risk assessment.

Manual Handling Routledge

Now the fundamental contents of the acclaimed Safety At Work are presented here in a user-friendly format, suitable for readers whose roles demand knowledge and competence in health and safety practice. This will include students for the NEBOSH National General Certificate examinations, and the IOSH Managing Safely and Working Safely awards. However, Health and Safety, 2nd Edition also encompasses other readers whose roles demand a level of knowledge and competence in health and safety practice, including human resources managers, office and site managers and all line staff with health and safety responsibilities. Health and Safety In Brief 2nd Edition will prove to be as indispensable as its predecessor to a much wider audience, and as such will be an invaluable addition to the bookshelves of anyone working within the field of safety at work.

Manual Handling Routledge

Based on the Management Standards, this new guide will help you, your employees and their representatives manage the issue sensibly and minimise the impact of work-related stress on your business. It might also help you improve how your organisation performs.

Introduction to International Health and Safety at Work Health and Safety Executive (Hse) This report presents the outcome of an exercise carried out to establish scientifically-based principles for manual handling training, both for conventional (two-handed, symmetrical) lifting and for non- standard lifting, where the conventional technique is inapplicable **Five Steps to Risk Assessment** Routledge

Manual Handling in Health and Social Care Routledge

The aim of this study, which is mainly qualitative in design, was to ascertain the attitudes of both employers and employees to the Health and Safety Executive's (HSE's) Guidance on the Manual Handling Operations Regulations 1992 (MHOR). This is of particular interest at the present time in light of the joint initiative between the Department of Health and the Health and Safety Executive entitled Back in Work (BiW).

Employers' and Employees' Response to Hse's Guidance on Manual Handling Operations Regulations (Mhor)

Mirroring a worldwide phenomenon in industrialized nations, the U.S. is experiencing a change in its demographic structure known as population aging. Concern about the aging population tends to focus on the adequacy of Medicare and Social Security, retirement of older Americans, and the need to identify policies, programs, and strategies that address the health and safety needs of older workers. Older workers differ from their younger counterparts in a variety of physical, psychological, and social factors. Evaluating the extent, causes, and effects of these factors and improving the research and data systems necessary to address the health and safety needs of older workers may significantly impact both their ability to remain in the workforce and their well being in retirement. Health and Safety Needs of Older Workers provides an image of what is currently known about the health and safety needs of older workers and the research needed to encourage social policies that guarantee older workers a meaningful share of the nation's work opportunities.

Managing Health, Safety and Working Environment Revised Edition

Learning Made Simple books give you skills without frills. They are matched to the main qualifications and written by experienced teachers and authors to make often tricky subjects simple to learn. Every book is designed carefully to provide bite-sized lessons matched to readers' needs. Using full colour throughout and written by leading teachers and writers, Learning Made Simple books build on a rich legacy of over 50 years as leading publishers helping to learn new skills and develop their talents. Whether studying at college, training at work, or reading at home, aiming for a qualification or simply getting up to speed, Learning Made Simple Books will give readers the advantage of easy, well-organized training materials in a handy volume you can refer to again and again. These titles will be promoted direct to training companies and learners, and individuals will be urged to buy them not only by college lecturers but also by trainers at work. These titles will be core stock for years to come. The books are written by experienced HR trainers and will be typeset by PK McBride (an experienced teacher and author of several Learning Made Simples himself). PK McBride has a thorough understanding of the ethos of the LMSs books and his involvement will insure that all titles have a layout and style consistent with the brand. Jacqueline Jeynes has run her own Management Consultancy business Opal Services, for 19 years, providing a wide range of management skills training across all industry sectors. She has appeared as an expert on 10 BBC TV programmes on H&S for small firms. She has regularly published articles in professional journals. She was a Commissioner on the Independent Inquiry into Drug Testing in the Workplace 2005 and been a member of many national and European Commission committees. A member of IBA and IOSH, she has just been awarded Specialist Business Adviser of the Year 2006-7. Currently a business adviser, tutor on Durham University MBA and supervisor-tutor for Aston University undergraduates on work placement year. She has published two books with Butterworth-Heinemann.

Health and Safety Law

The Assessment of Repetitive Tasks (ART) tool is designed to help risk assess tasks that require repetitive moving of the upper limbs (arms and hands). It assists you in assessing some of the common risk factors in repetitive work that contribute to the development of Upper Limb Disorders (ULDs).

Design Risk Management

This publication is aimed at employers and employees across all industries. It gives revised guidance on the Manual Handling Operations Regulations 1992.
