New York Herald Tribune Book Review Intellect Books

The purpose of this book is to highlight major debates in Information Technology ("IT") that might be of interest to fledgling MIS students to help them get a sense of the big ideas in their field. This book is intended for graduate and undergraduate audiences but is easily accessible to practitioners and students alike. Each big idea is presented as a resolution for discussion, one per chapter, and each chapter opens with a broad overview of the resolution, followed by pro and con discussions weighing the merits of the issue. These informative chapters should help students quickly get up to speed on the facts of the issue in order to stimulate more fruitful class discussion. Chapters were authored and reviewed entirely by graduate students as part of an online class project spanning two semesters from 2013 to 2014. Over 80 students contributed to writing it. Faculty editorship enhanced the chapters' consistency and where necessary, smoothed the writing style. As a whole, this work embodies an important achievement for which these students should be commended. It shows (once again) just how capable students really are.

Chronicles, Comprising 1. The Description and Historie of England. 2. The Description and Historie of Ireland. 3. The Description and Historie of Scotland ... Now Newlie Augmented and Continued ... to the Yeare 1586 by John Hooker Alias Vowell Gent. and Others Rough Guides UK

The food industry is a notoriously complex economic sector that has not received the attention it deserves within legal scholarship. Production and distribution of food is complex because of its polycentric character (as it operates at the intersection of different public policies) and its dynamic evolution and transformation in the last few decades (from technological and governance perspectives). This volume introduces the global value chain approach as a useful way to analyse competition law and applies it to the operations of food chains and the challenges of their regulation. Together, the chapters not only provide a comprehensive mapping of a vast comparative field, but also shed light on the intricacies of the various policies and legal fields in operation. The book offers a conceptual and theoretical framework for competition authorities, companies and academics, and fills a massive gap in the competition policy literature dealing with global value chains and food.

?Die Mobilisierung unserer Gesellschaft trifft auf zahlreiche Entwicklungsprojekte mobiler Applikationen, die zunächst enthusiastisch begonnen wurden, letztlich aber gescheitert sind. Am Beispiel des Mobile Learning stellt Philipp Maske in diesem zweibändigen Werk heraus, dass Entwicklungsprozesse mobiler Applikationen von einem bisher unerforschten interdisziplinären Wirknetzwerk der Dimensionen Ökonomie, Technologie und Didaktik beeinflusst werden. Basierend auf diesem Wirknetzwerk wird ein Vorgehensmodell als Instrument der gestaltungsorientierten Wirtschaft konstruiert, dessen Nützlichkeit anhand einer Fallstudienimplementierung bewertet wird.

The concept of the avant garde is highly contested, whether one consigns it to history or claims it for present-day or future uses. The first volume of The Idea of the Avant Garde – And What It Means Today provided a lively forum on the kinds of radical art theory and partisan practices that are possible in today's world of global art markets and creative industry entrepreneurialism. This second volume presents the work of another 50 artists and writers, exploring the diverse ways that avant-gardism develops reflexive and experimental combinations of aesthetic and political praxis. The manifest strategies, temporalities, and genealogies of avant-garde art and politics are expressed through an international, intergenerational, and interdisciplinary convocation of ideas that covers the fields of film, video, architecture, visual art, art activism, literature, poetry, theatre, performance, intermedia and music.
