Riley Appleton loves to hate me. It's my fault the hate is there in the first place. She needed somewhere to direct her anger, and I volunteered to be the target. Being adored is boring. I wanted something different. Each jab that falls from her pretty mouth is a challenge, and the more we fight, the hotter we burn. But soon, this game of ours goes too far. She needs to be reminded who really rules this relationship. Our feud is a joke-but in the end, I'll be the only one

laughing. This is a standalone in the Fallen Royals series. It is recommended to read the Wicked trilogy prior, but not necessary.

This interdisciplinary collection provides a set of innovative and inventive approaches to the use of video as a research method. Building on the development of visual methods across the social sciences, it highlights a range of possibilities for making and working with video data. The collection showcases different video methods, including video diaries, video go-alongs, time-lapse video, mobile devices, multi-angle video recording, video ethnography, and ethnographic documentary. Each method is presented through a case study, showing how it can be used in practice. The authors offer pragmatic advice and discuss practical issues, including equipment, techniques and skills,

analysis, and presentation. They also show how video methods can be used in a range of different contexts – at train stations, on bicycles, in schools, outdoors, and in museums – to investigate worlds that are visible, audible, tangible, and in motion. In doing so, they illuminate the theoretical possibilities that video methods offer for researching the body, identity, everyday life, affect, time, and space.

This book explores the significance of silence within and beyond pedagogical contexts. Silence is a complex and multidimensional phenomenon for everyday life: since schools mirror society, it is also significant in education. While silence can be experienced in a multitude of different ways, the author reflects on whether silence itself can bear a message: is there an aspect of dialogue in silence, or is it a language all of its own? This book examines a variety of silences essential for education, examining such topics as silence and aspects of power, silent students, and the relationship between listening and silence. Drawing on a range of empirical data, the author

elucidates the significance of silence in pedagogical contexts.

This paper recounts Chile's experience with capital account policies since the 1990s. We present how two external shocks were confronted under very different macroeconomic and capital account frameworks. We show that during the 1997-98 Asian-LTCM-Russia crisis, a closed capital account and relatively rigid exchange rate severely constrained the monetary policy response to the shock, aggravating the fall in domestic demand. During the 2008-09 crisis, a full-fledged inflation targeting framework allowed the authorities to implement a significant countercyclical response. We argue that domestic stability considerations lay behind the policy regime switch toward

capital account liberalization from 1999 onwards.

Modern Macroeconomics Wiley Global Education

A textbook that approaches modern macroeconomics through its microeconomic foundations, with an emphasis on financial market connections and policy applications. The modern study and analysis of macroeconomics begins by considering how microeconomic units—consumers and firms—make decisions, and then investigates how these choices interact to yield economy-wide outcomes. This innovative textbook takes this “modern” approach, teaching macroeconomics through its microeconomic foundations. It does so by

adopting the representative agent paradigm. By modeling the representative consumer and the representative firm, students will learn to describe macroeconomic outcomes and consider the effects of macroeconomic policies. Unique in its coverage of monopolistic competition, financial markets, and the interaction of fiscal and monetary policy, *Modern Macroeconomics* is suitable for use in intermediate undergraduate, advanced undergraduate, and graduate level courses. The book first introduces the building blocks of macroeconomics, the heart of which is the representative consumer. It goes on to offer a brief history of macroeconomic thought, including supply-side economics, the Phillips curve, and the New Keynesian framework. It then covers two policy applications, monetary policy and the interaction of monetary and fiscal policy; optimal policy analysis for both the flexible price and the rigid price case; long-run steady states, treating the Solow growth framework and the neoclassical growth model; a search-and-matching framework for the analysis of unemployment; and the application of the tools of modern macroeconomics to “open economy,” or international

macroeconomics. End-of-chapter problem sets enable students to apply the concepts they have learned. A separate Solutions Manual will be available for students to purchase. Teaching materials, including complete solutions and slides, will be available to qualified instructors. *Vicious Desire* Cengage Learning An introduction to the Middle East, provides an overview of the history, geography, cultures, and religions and leads up the regions twenty-first century conflicts, including the Iraq War. With its emphasis on basic concepts and vocabulary, and its use of illustrative case studies, *Politics of the Middle East* provides an exciting tool for the basic understanding of this very complex region. This comprehensive book covers cultures and history of the ancients, the birth of Islam, and the Ottoman Empire; Arab-Israeli conflicts and their origins; Turkey and the Kurds; the Persian Gulf and the rise of the oil kingdoms, the Iranian revolution, and the first and second Gulf Wars; and Middle Eastern terrorism. An excellent reference resource for those involved in businesses and concerns that deal with the Middle East and its politics. New Age International

Following the 1979 revolution, the Iranian government set out to Islamize society. Muslim piety had to be visible, in personal appearance and in action. Iranians were told to pray, fast, and attend mosques to be true Muslims. The revolution turned questions of what it means to be a true Muslim into a matter of public debate, taken up widely outside the exclusive realm of male clerics and intellectuals. *Say What Your Longing Heart Desires* offers an elegant ethnography of these debates among a group of educated, middle-class women whose voices are often muted in studies of Islam. Niloofar Haeri follows them in their daily lives as they engage with the classical poetry of Rumi, Hafez, and Saadi, illuminating a long-standing mutual inspiration between prayer and poetry. She recounts how different forms of prayer may transform into dialogues with God, and, in turn, Haeri illuminates the ways in which believers draw on prayer and ritual acts as the emotional and intellectual material through which they think, deliberate, and debate.
