This book aims at capitalizing and transmitting know-how about the design of Augmented Environments (AE) from some of the most prominent laboratories in the field worldwide. The authors belong to the RUFAR network (Research on User-Friendly Augmented Environments, founded in 2002) who meet in research seminars to share experience; Writing this book was perceived as an opportunity to look back over the last few years to sum up important findings; and formalize their approach and experience, which they never had the time or opportunity to do. Although the authors of this book have very different backgrounds, striking similarities emerge in their approach and design principles: never-endingness, activity-orientedness, continuous design, realism are some of the pillars of this approach; enabling to deal with the complex, heterogeneous, multi-user and multi-purpose constructions which AE designers have to face. The book illustrates how these principles enabled them to construct robust, efficient, and user-friendly Augmented Environments in spite of the many challenges to make these operational. We hope their experience will help the reader. Primary audience: Academics, Students and Professionals involved in the CHI, CSCW, Ubicomp, Cooperative Building communities. Computer Scientists interested by end-users and applications, Social Scientists operating in the IT domain, IT & Organization Consultants. Secondary audience: Developers of office and conferencing applications or middleware, Architects of office buildings, Space Planners, Designers; Facility Managers; IT, furniture & building Business Communities.

The Mining Manual and Mining Year Book Springer

"A good read for anyone who wants to understand what actually determines whether a developing economy will succeed." —Bill Gates, "Top 5 Books of the Year" An Economist Best Book of the Year from a reporter who has spent two decades in the region, and who the Financial Times said "should be named chief myth-buster for Asian business." In *How Asia Works*, Joe Studwell distills his extensive research into the economies of nine countries—Japan, South Korea, Taiwan, Indonesia, Malaysia, Thailand, the Philippines, Vietnam, and China—into an accessible, readable narrative that debunks Western misconceptions, shows what really happened in Asia and why, and for once makes clear why some countries have boomed while others have languished. Studwell's in-depth analysis focuses on three main areas: land policy, manufacturing, and finance. Land reform has been essential to the success of Asian economies, giving a kick-start to development by utilizing a large workforce and providing capital for growth. With manufacturing, industrial development alone is not sufficient, Studwell argues. Instead, countries need "export discipline," a government that forces companies to compete on the global scale. And in finance, effective regulation is essential for fostering, and sustaining growth. To explore all of these subjects, Studwell journeys far and wide, drawing on fascinating examples from a Philippine sugar baron's stifling of reform to the explosive growth at a Korean steel mill.

"Provocative . . . *How Asia Works* is a striking and enlightening book . . . A lively mix of scholarship, reporting and polemic." —The Economist

Rhino smugglers, international espionage, and a missing person investigation collide in this “powerhouse read” from the acclaimed South African author (Publishers Weekly, starred review). Lemmer’s first rule is “Don’t get involved.” A highly skilled bodyguard with a violent, criminal past, he has settled into a quiet life in Loxton, South Africa. But when a wealthy farmer asks him to help save a pair of rare black rhinos by smuggling them out of Zimbabwe, Lemmer can’t say no. Now he’s on a small airplane, zipping across the border with a military-grade shotgun at his feet—sensing that he’s about to regret breaking his own rule. Weaving together Lemmer’s story with a missing person investigation and the machinations of a top intelligence agency, Trackers is “a sprawling, invigorating and socially committed crime novel” (The Independent). “Deon Meyer is one of the unsung masters.” —Michael Connelly, New York Times – bestselling author of the Harry Bosch novels “Meyer’s ambition matches his execution in this brilliantly complex stand-alone thriller set in his native South Africa.” —Publishers Weekly, starred review “[Meyer is] the king of South African crime fiction.” —Booklist, starred review

All organizations, institutions, business processes, markets and strategies have one aim in common: the reduction of transaction costs. This aim is pursued relentlessly in practice, and has been perceived to bring about drastic changes, especially in the recent global market and the cyber economy. This book analyzes and describes “transactions” as a model, on the basis of which organizations, institutions and business processes can be appropriately shaped. It tracks transaction costs to enable a scientific approach instead of a widely used “state-of-the-art” approach, working to bridge the gap between theory and practice. This open access book analyzes and describes “transactions” as a model...
