The phone is missing the functionality of my EVO 3D. I live in a strong 4G area but the new LTE will not pickup the signal and the phone doesn't have the funtion to be able to manually switch to 4G from 3G. It appears to be either a 3G of 4G LTE ONLY NOT a 4G phone. I use it as a Hotspot in my

home and it simply doesn't work.

Re: TO ALL HTC EVO 4G LTE owners...REVIEWS!!! You can turn off 4G by going to Settings > Mobile Network > Network Mode and choose CDMA Only instead of the

default LTE/CDMA. Granted it is not as simple as a quick toggle that was available on older phones like Samsung Epic 4g, etc.

I agree with ROCZ3CQG1. Just return the GS3 and use the evo 3D for a while longer. I have the evo lte and used it for a month or so and I was not having a lot of the problems some people were having with both the evo lte's and the GS3's but the 3G was so SLOW that I put the evo lte back in the box and turned my old evo 4G back on and using it for a while.
