Competitive advantage in banking comes from effective use of technology. The Handbook of Banking Technology provides a blueprint for the future of banking, with deep insight into the technologies at the heart of the industry. The rapid evolution of IT brings continual change and demand for investment — yet keeping pace with these changes has become an essential part of doing business. This book describes how banks can harness the power of current and upcoming technology to add business value and gain a competitive advantage; you'll learn how banks are using technology to drive business today, and which emerging trends are likely to

drive the evolution of banking over the next decade. Regulation is playing an ever increasing role in banking and the impact of regulatory change on technology and the management of it are discussed — while mandatory changes put pressure on many of our high street banking brands, their ability to adapt and utilise technology will have a fundamental impact on their success in the rapidly changing marketplace. Technology costs can amount to 15 per cent or more of operational costs and bank leaders need to be able to make informed decisions about technology investments in light of the potential benefits. This book explores the depth and breadth of banking technology to help decision makers stay up to date and drive better business. Assess your current technology against the new banking paradigms. Procure the systems needed to protect the bottom line. Implement newer

technology more efficiently and effectively Ensure compliance and drive value with appropriate technology management Technological change is driven by mass adoption of new channels, innovation from new entrants, and by banks themselves as a means of increasing revenue and reducing costs. The Handbook of Banking Technology offers a comprehensive look at the role of technology in banking, and the impact it will have in the coming years.

Lemmer's First Law: Don't get involved. But when Emma le Roux looks at him with pleading eyes, when the roof of his Karoo house needs big repairs, when the cause is good and just, laws can be broken. So he sighs, and says, yes, he'll ride shotgun for two rare black rhinos. Bad decision. Because on a dark and

dusty road in Limpopo, they stick a Smith & Wesson Model 500 against his head. They kick him and beat him, they lie, they deceive him, and they steal his Glock, the one with his fingerprints all over it. They should have killed him. And now he goes after them--the start of a trail of violence that will run the length and breadth of a country, and touch many lives. It will leave a trail of blood through the first private-investigation dossier of former cop Mat Joubert. It's a "fifty-five," police slang for a missing persons case. It will stomp fear and horror through the life of Milla Strachan, who walked out on her rich, cheating husband and abusive teenage son to start a new life. A trail of death, stretching from the Chizarira to the Cape Waterfront. And at the end of it, nobody will be untouched.

Innovation in technology and services was once the result of specialist knowledge developed within a single corporation; now, a single focus on the development of new products and services is no longer enough. In *Interactive Business Communities*, Mitsuru Kodama shows how a new business approach can enable managers to access, share and integrate diverse knowledge both inside and outside the corporation using *Boundary Networks* to operate across more formal organizational and knowledge boundaries at all levels. Drawing on his studies of large corporations in America and the Far East, Mitsuru, shows how different companies have already started to take this path. He explains the kind of networks and strategic partnerships that have emerged and gives practical guidelines on how to begin forming in-house business communities and extending this to interactive business communities with customers

and other organizations. This book is a valuable resource for business educators and researchers, and senior executives responsible for strategy, particularly in high-tech industries, will find insights and ideas to tackle 21st century market and business discontinuities.

Vast manpower and resources are needed to investigate cybercrimes. The use of new advanced technologies, such as machine learning combined with automation, are effective in providing significant additional support in prevention of cyber-attacks, in the speedy recovery of data, and in reducing human error. This new volume offers a comprehensive study of the advances that have been made in cybercrime investigations and digital

forensics, highlighting the most up-to-date tools that help to mitigate cyber-attacks and to extract digital evidence for forensic investigations to recover lost, purposefully deleted, or damaged files. The chapters look at technological cybersecurity tools such as artificial intelligence, machine learning, data mining, and others for mitigation and investigation.

If you are a web programmer, you need to know modern PHP. This book presents with many new areas in which PHP plays a large role. If you want to write a mobile application using geo-location data, Pro PHP Programming will show you how. Additionally, if you need to make sure that you can write a multilingual indexing application using Sphinx, this book will help you avoid the pitfalls. Of course, Pro PHP

Programming gives a thorough survey of PHP post-5.3. You'll begin by working through an informative survey and clear guide to object-oriented PHP. Then, you'll be set for the core of the book on modern PHP applications. Now, you'll be able to start with the chapter on PHP for mobile programming and move on to sampling social media applications. You'll also be guided through new PHP programming language features like closures and namespaces. Pro PHP Programming deals with filtering data from users and databases next, so you'll be well prepared for relational and NoSQL databases. Of course, you can also learn about data retrieval from other sources, like OCR libraries or websites. Then the question of how to format and present data arises, and

in Pro PHP Programming, you'll find solutions via JSON, AJAX and XML.

The 2010 edition of the Passive and Active Measurement Conference was the 11th of a series of successful events. Since 2000, the Passive and Active Measurement (PAM) conference has provided a forum for presenting and discussing innovative and early work in the area of Internet measurements. PAM has a tradition of being a workshop-like conference with lively discussion and active participation from all attendees. This event focuses on research and practical applications of network measurement and analysis

techniques. This year's conference was held at ETH Zurich, Switzerland. PAM 2010 attracted 79 submissions. Each paper was carefully reviewed by at least three members of the Technical Program Committee. The reviewing process led to the acceptance of 23 papers. The papers were arranged in nine sessions covering the following areas: routing, transport protocols, mobile devices, topology, measurement infrastructure, characterizing network usage, analysis techniques, traffic analysis, and the Web. We are very grateful to Endace Ltd. (New Zealand), Cisco Systems Inc. (USA), armasuisse (Switzerland) and the COST Action TMA whose sponsoring allowed us to keep registration

costs slow and to o?er several travel grants to PhD students. We are also grateful to ETH Zurich for sponsoring PAM as a host.

Interactive mobile technologies have now become the core of many—if not all—fields of society. Not only do the younger generation of students expect a mobile working and learning environment, but also the new ideas, technologies and solutions introduced on a nearly daily basis also boost this trend. Discussing and assessing key trends in the

mobile field were the primary aims of the 11th International Conference on Interactive Mobile Communication, Technologies and Learning (IMCL2017), which was held in Thessaloniki from 30 November to 01 December 2017. Since being founded in 2006, the conference has been devoted to new approaches in interactive mobile technologies, with a focus on learning. The IMCL conferences have in the meanwhile become a central forum of the exchange of new research results and relevant trends, as well as best practices. This book contains papers in the fields of: Future Trends and Emerging Mobile Technologies Design and Development of Mobile Learning Apps and Content Mobile Games—Gamification and Mobile Learning Adaptive Mobile Environments Augmented Reality and Immersive Applications Tangible, Embedded and Embodied Interaction Interactive Collaborative and Blended Learning Digital Technology in Sports Mobile Health

Care and Training Multimedia Learning in Music Education 5G Network Infrastructure Case Studies Real-World Experiences The content will appeal to a broad readership, including policymakers, academics, educators, researchers in pedagogy and learning theory, school teachers, the learning industry, further education lecturers, etc.
