Data security and privacy law continues to evolve at a rapid pace, resulting in many compliance pitfalls beyond traditional laws and regulations. Most institutions are not able to keep up. Is yours? Despite the amount of legislation, regulation and litigation, the handling and security of data is still in the early stages of development, where groundbreaking initiatives continue to occur. With the rising influx of jurisdictional issues, which are confusing at best and often contradictory, having a complete analysis of the legal treatment of major issues is key. That's what Data Privacy, Protection and Security Law is here to do, bringing you the key opinions from outstanding legal experts, rather than another recitation of the law. Data Privacy, Protection and Security Law: • Lays out all legal liability issues regarding privacy in an easily accessible, eBook format • Provides a complete analysis of legal treatments, with commentary from our expert authors • Examines whether and how the courts, regulators and parties make the correct judgments • Gives legal context for business planning in connection with data privacy and security compliance • Includes periodic updates to keep you informed on the latest developments in data privacy and security law In depth topics covered include: • Data protection laws • Selected e-commerce privacy issues • Identity theft • Personal data security: Issues in Law • Data security and wrongdoer's liability • Voluntary obligations to third parties • Obligations imposed in Law • And other data security issues! The authors are the top experts in e-commerce law. Raymond T. Nimmer is the Dean and the Leonard Childs professor of law at the University of Houston Law Center, where he also codirects the Intellectual Property and Information Law Institute. He was reporter for the Uniform Computer Information Transactions Act, and is internationally acclaimed as an expert on electronic commerce law. Holly K. Towle is the cross-firm coordinator of the E-Merging Commerce practice group at K&L Gates (Kirkpatrick & Lockhart, Preston Gates Ellis LLP). She is one of the world's most respected authorities on Internet-based transactions and banking law. Together they provide authoritative analyses of all the different issues facing those transacting e-commerce, including rights, licenses, liabilities, and compliance.

This proceedings book comprises the latest achievements in research and development in educational robotics presented at the 11th International Conference on Robotics in Education (RiE), which was carried out as a purely virtual conference from September 30 to October 2, 2020. Researchers and educators will find valuable methodologies and tools for robotics in education that encourage learning in the fields of science, technology, engineering, arts and mathematics (STEAM) through the design, creation and programming of tangible artifacts for creating personally meaningful objects and addressing real-world societal needs. This also involves the introduction of technologies ranging from robotics platforms to programming environments and languages. Evaluation results prove the impact of robotics on the students' interests and competence development. The presented approaches cover the whole educative range from elementary school to university in both formal as well as informal settings.
