The Mammography Quality Control Manual, developed by the ACR Committee on Quality Assurance in Mammography, is designed to help mammography facilities establish and maintain a quality control program. Included in the set are four sections, one each for radiologists, radiologic

technologists, medical physicists, and a new section on clinical image quality. Each section describes step-by-step instructions on equipment testing, performance criteria, and patient positioning. All tests comply with the new MQSA regulations, which went into effect April, 1999. The manual also seeks to define the areas of responsibility for each of the professionals involved in this important health care field. (1999 Revised edition)

In June 2019, the Committee on the Judiciary initiated a bipartisan investigation into the state of competition online, spearheaded by the Subcommittee on Antitrust, Commercial and Administrative Law. As part of a top-to-bottom review of the market, the Subcommittee examined the dominance of Amazon, Apple, Facebook, and Google, and their business practices to determine how their

power affects our economy and our democracy. Additionally, the Subcommittee performed a review of existing antitrust laws, competition policies, and current enforcement levels to assess whether they are adequate to address market power and anticompetitive conduct in digital markets. Over the course of our investigation, we collected extensive evidence from these companies as well as from third parties—totaling nearly 1.3 million documents. We held seven hearings to review the effects of market power online—including on the free and diverse press, innovation, and privacy—and a final hearing to examine potential solutions to

concerns identified during the investigation and to inform this Report's recommendations. A year after initiating the investigation, we received testimony from the Chief Executive Officers of the investigated companies: Jeff Bezos, Tim Cook, Mark Zuckerberg, and Sundar Pichai. For nearly six hours, we pressed for answers about their business practices, including about evidence concerning the extent to which they have exploited, entrenched, and expanded their power over digital markets in anticompetitive and abusive ways. Their answers were often evasive and non-responsive, raising fresh questions about whether they believe

they are beyond the reach of democratic oversight. Although these four corporations differ in important ways, studying their business practices has revealed common problems

show up for a world that needs us all. This is a book about a big idea. And the idea is this: Slowly over the past few decades, and now suddenly, all at once, we 're suffering from a collapse in Meaning. Fundamentalism and nihilism are filling that vacuum, with consequences that affect us all. In a world that needs us at our best, diseases of despair, tribalism, and disaster fatigue are leaving us at our worst. It 's vital that we regain control of the stories we 're telling because they are shaping the future we 're creating. To do that, we have to remember our deepest inspiration, heal our pain and

apathy, and connect to each other like never before. If we can do that, we 've got a shot at solving the big problems we face. And if we can 't? Well, the dustbin of history has swallowed civilizations older and fancier than ours. This book is divided into three parts. The first, Choose Your Own Apocalypse, takes a look at our current Meaning Crisis--where we are today, why it 's so hard to make sense of the world, what might be coming next, and what to do about it. It also makes a case that many of our efforts to cope, whether anxiety and denial, or

tribalism and identity politics, are likely making things worse. The middle section, The Alchemist Cookbook, applies the creative firm IDEO 's design thinking to the Meaning Crisis. This is where the book gets hands on--taking a look at the strongest evolutionary drivers that can bring about inspiration, healing, and connection. From breathing, to movement, sexuality, music, and substances--these are the everyday tools to help us wake up, grow up, and show up. AKA--how to blow yourself sky high with household materials. And the best part? They 're

accessible, by anyone  
anywhere, no

Transcendence  
democratized. The  
final third of the  
book, *Ethical Cult  
Building*, focuses on  
the tricky nature of  
putting these kinds of  
experiences into gear  
and into  
culture—because,  
anytime in the past  
when we ’ ve figured  
out combinations of  
peak states and deep  
healing, we ’ ve  
almost always ended  
up with problematic  
cultry communities.  
*Playing with fire* has  
left a lot of people  
burned. This section  
lays out a roadmap  
for sparking a  
thousand fires  
around the  
world--each one  
unique and tailored

to the needs and  
values of its  
participants. Think  
of it as an open-  
source toolkit for  
building ethical  
culture. In *Recapture  
the Rapture*, we ’ re  
taking radical  
research out of the  
extremes and  
applying it to the  
mainstream--to the  
broader social  
problem of healing,  
believing, and  
belonging. It ’ s  
providing answers to  
the questions we face:  
how to replace blind  
faith with direct  
experience, how to  
move from broken to  
whole, and how to  
cure isolation with  
connection. Said  
even more plainly, it  
shows us how to  
revitalize our bodies,  
boost our creativity,

rekindle our  
relationships, and  
answer once and for  
all the questions of  
why we are here and  
what do we do now?  
In a world that needs  
the best of us from  
the rest of us, this is a  
book that shows us  
how to get it done.
