A collection of essays and stories documenting the lived theology and spirituality we need to hear in order to lean into a more freeing, loving, and liberating faith—from the hosts of the beloved Truth's Table podcast "The liberating work of Truth's Table creates breathing room to finally have those conversations we've been needing to have."—Morgan Harper Nichols, artist and poet Once upon a time, an activist, a theologian, and a psychologist walked into a group chat. Everything was laid out on the table: Dating. Politics. The Black church. Pop culture. Soon, other Black women began pulling up chairs to gather round. And so, the Truth's Table podcast was born. In their literary debut, co-hosts Christina Edmondson, Michelle Higgins, and Ekemini Uwan offer stories by Black women and for Black women examining theology, politics, race, culture, and gender matters through a Christian lens. For anyone seeking to explore the spiritual dimensions of hot-button issues within the church, or anyone thirsty to deepen their faith, Truth's Table provides exactly the survival guide we need, including: • Michelle Higgins's unforgettable treatise revealing the way "racial reconciliation" is a spiritually bankrupt, empty promise that can often drain us of the ability to do real justice work • Ekemini Uwan's exploration of Blackness as the image of God in the past, present, and future • Christina Edmondson's reimagination of what a more just and liberating form of church discipline might look like—one that acknowledges and speaks to the trauma in the room These essays deliver a compelling theological re-education and pair the spiritual formation and political education necessary for Black women of faith.

Apple Training Series John Wiley & Sons
Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice

environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

The software industry has undergone rapid development since the beginning of the twenty-first century. These changes have had a profound impact on translators who, due to the evolving nature of digital content, are under increasing pressure to adapt their ways of working. Localizing Apps looks at these challenges by focusing on the localization of software applications, or apps. In each of the five core chapters, Johann Roturier examines: The role of translation and other linguistic activities in adapting software to the needs of different cultures (localization); The procedures required to prepare source content before it gets localized (internationalization); The measures taken by software companies to guarantee the quality and success of a localized app. With practical tasks, suggestions for further reading and concise chapter summaries, Localizing Apps takes a comprehensive look at the transformation processes and tools used by the software industry today. This text is essential reading for students, researchers and translators working in the area of translation and creative digital media.
