Netscape has captured the lion's share of the Web browser market. Its advanced features make it the premier Internet navigation tool you can use. The Macintosh is ideally suited to take advantage of the features of Web browser like Netscape since most Macs are already set up to run the basic capabilities that you will need including graphics and sound. This book will show you how to set up and configure Netscape, as well as a variety of other Web Browsers for the Macintosh, including NCSA MacMosaic, PLUSMosaic, MacWeb, and NetShark. As well as providing an up-to-date snapshot of some of the best web sites around, the author also includes an introduction to Netscape 2.0 for the Macintosh and illustrates some of its powerful new features.

This book provides the theory behind integration of technology, provides a rationale for that integration, and explores resources and methods for supporting others in their growth in technology integration. Educational leaders will be a particular focus of the book as the need to be prepared to help their faculty integrate technology into their institutions. They are knowledgeable about administrative responsibilities, but not always as knowledgeable about theories and best practices of technology integration. Each chapter begins with a scenario or example from K-12 or higher education to illustrate the ideas presented in the chapter, then the chapter delves into the theoretical background, followed by a technology example, and concluding with activities readers could engage in to deepen their understanding of the concepts presented.

Standards and Standardization: Concepts, Methodologies, Tools, and Applications Routledge Five years and more than 100,000 copies after it was first published, it's hard to imagine anyone working in Web design who hasn't read Steve Krug's "instant classic" on Web usability, but people are still discovering it every day. In this second edition, Steve adds three new chapters in the same style as the original: wry and entertaining, yet loaded with insights and practical advice for novice and veteran alike. Don't be surprised if it completely changes the way you think about Web design. Three New Chapters! Usability as common courtesy -- Why people really leave Web sites Web Accessibility, CSS, and you -- Making sites usable and accessible Help! My boss wants me to _____. -- Surviving executive design whims "I thought usability was the enemy of design until I read the first edition of this book. Don't Make Me Think! showed me how to put myself in the position of the person who uses my site. After reading it over a couple of hours and putting its ideas to work for the past five years, I can say it has done more to improve my abilities as a Web designer than any other book. In this second edition, Steve Krug adds essential ammunition for those whose bosses, clients, stakeholders, and marketing managers insist on doing the wrong thing. If you design, write, program, own, or manage Web sites, you must read this book." -- Jeffrey Zeldman, author of Designing with Web

The Manual of Tests and Criteria contains criteria, test methods and procedures to be used for classification of dangerous goods according to the provisions of Parts 2 and 3 of the United Nations Recommendations on the Transport of Dangerous Goods, Model Regulations, as well as of chemicals presenting physical hazards according to the Globally Harmonized System of Classification and Labelling of Chemicals (GHS). As a consequence, it supplements also national or international regulations which are derived from the United Nations Recommendations on the Transport of Dangerous Goods or the GHS. At its ninth session (7 December 2018), the Committee adopted a set of amendments to the sixth revised edition of the Manual as amended by Amendment 1. This seventh revised edition takes account of these amendments. In addition, noting that the work to facilitate the use of the Manual in the context of the GHS had been completed, the Committee considered that the reference to the "Recommendations on the Transport of Dangerous Goods" in the title of the Manual was no longer appropriate, and decided that from now on, the Manual should be entitled "Manual of Tests and Criteria".

macOS Support Essentials 10.13 - Apple Pro Training Series Peachpit Press

The New York Times bestseller that gives readers a paradigm-shattering new way to think about motivation from the author of When: The Scientific Secrets of Perfect Timing Most people believe that the best way to motivate is with rewards like money—the carrot-and-stick approach. That's a mistake, says Daniel H. Pink (author of To Sell Is Human: The Surprising Truth About Motivating Others). In this provocative and persuasive new book, he asserts that the secret to high performance and satisfaction-at work, at school, and at home—is the deeply human need to direct our own lives, to learn and create

new things, and to do better by
ourselves and our world. Drawing on
four decades of scientific research
on human motivation, Pink exposes
the mismatch between what science
knows and what business does—and
how that affects every aspect of
life. He examines the three
elements of true
motivation—autonomy, mastery, and
purpose-and offers smart and
surprising techniques for putting
these into action in a unique book
that will change how we think and
transform how we live.
