Security is a major consideration in the way that business and information technology systems are designed, built, operated, and managed. The need to be able to integrate security into those systems and the discussions with business functions and operations exists more than ever. This IBM® Redbooks® publication explores concerns that characterize security requirements of, and threats to, business and information technology (IT) systems. This book identifies many business drivers that illustrate these concerns, including managing risk and cost, and compliance to business policies and external regulations. This book shows how these drivers can be translated into capabilities and security needs that can be

represented in frameworks, such as the IBM Security Blueprint, to better enable enterprise security. To help organizations with their security challenges, IBM created a bridge to address the communication gap between the business and technical perspectives of security to enable simplification of thought and process. The IBM Security Framework can help you translate the business view, and the IBM Security Blueprint describes the technology landscape view. Together, they can help bring together the experiences that we gained from working with many clients to build a comprehensive view of security capabilities and needs. This book is intended to be a valuable resource for business leaders, security officers, and consultants who want to understand and implement enterprise security by considering a set of core security capabilities and services.

The act of eating is both erotic and violent, as one wholly consumes the object being eaten. At the same time, eating performs a kind of vulnerability to the world, revealing a fundamental interdependence between the eater and that which exists outside her body. *Racial Indigestion* explores the links between food, visual and literary culture in

the nineteenth-century United States to reveal how eating produces political subjects by justifying the social discourses that create bodily meaning. Combing through a visually stunning and rare archive of children ' s literature, architectural history, domestic manuals, dietetic tracts, novels and advertising, *Racial Indigestion* tells the story of the consolidation of nationalist mythologies of whiteness via the erotic politics of consumption. Less a history of commodities than a history of eating itself, the book seeks to understand how eating became a political act, linked to appetite, vice, virtue, race and class inequality and, finally, the queer pleasures and pitfalls of a burgeoning commodity culture. In so doing, *Racial Indigestion* sheds light on contemporary " foodie " culture ' s vexed relationship to nativism, nationalism and race privilege.

This IBM® Redpaper® publication provides a broad understanding of a new architecture of the IBM Power® E1080 (also known as the Power E1080) server that supports IBM AIX®, IBM i, and selected distributions of Linux operating systems. The objective of this paper is to introduce the Power E1080, the most powerful and scalable server of the IBM Power portfolio, and its offerings and relevant functions:
Designed to support up to four system nodes and up to 240 IBM Power10™ processor cores The Power E1080 can be initially ordered with a single system node or two system nodes configuration, which provides up to 60 Power10 processor cores with a single node configuration or up to 120 Power10 processor cores with a two system nodes configuration. More support for a three or four system nodes configuration

is to be added on December 10, 2021, which provides support for up to 240 Power10 processor cores with a full combined four system nodes server. Designed to supports up to 64 TB memory The Power E1080 can be initially ordered with the total memory RAM capacity up to 8 TB. More support is to be added on December 10, 2021 to support up to 64 TB in a full combined four system nodes server. Designed to support up to 32 Peripheral Component Interconnect® (PCIe) Gen 5 slots in a full combined four system nodes server and up to 192 PCIe Gen 3 slots with expansion I/O drawers The Power E1080 supports initially a maximum of two system nodes; therefore, up to 16 PCIe Gen 5 slots, and up to 96 PCIe Gen 3 slots with expansion I/O drawer. More support is to be added on December 10, 2021, to support up to 192 PCIe Gen 3 slots with expansion I/O drawers. Up to over 4,000 directly attached serial-attached SCSI (SAS) disks or solid-state drives (SSDs) Up to 1,000 virtual machines (VMs) with logical partitions (LPARs) per system System control unit, providing redundant system master Flexible Service Processor (FSP) Supports IBM Power System Private Cloud Solution with Dynamic Capacity This publication is for professionals who want to acquire a better understanding of Power servers. The intended audience includes the following roles: Customers Sales and

Some memories you do your best to forget.

Others you wish you simply had the opportunity
to remember. Mason Everett found himself in the
center of both, as he felt the warmth of an autumn
sun graze his face through the tinted windows. A
successful Real-estate developer, Mason had his
picture perfect life. He was young, handsome,
wealthy and single. No stranger to frequent hook
ups at the local night clubs he avoided
relationships at all costs living tirelessly by one
rule: “ Never let anyone close enough again to
hurt you ” Until he found himself falling for
Sydney McCail, a young woman he met at his
brother's wedding. In the midst of a developing
relationship Mason's past begins to surface

causing him to push Sydney away in fear of her
finding out a secret he'd kept hidden for most of
his adult life. In the wake of a tragic accident she
finds that what she thought she knew was only the
beginning, and what happens from there leaves
them both searching for answers to a single
question in what turns out to be a startling
outcome, Where We Left Off.

With her heart in tatters after a relationship
break-up, Rose Bennett swaps her hometown
of London for the sunny shores of Australia
— but she arrives to find the Shingle Valley
shrouded in winter. As the weather improves,
Rose starts to unlock the secrets of the valley
— from bonfire ceremonies and wine-making
traditions to eccentric locals and their
histories. Despite herself, Rose starts to fall in
love: with the valley, the wines, the two
children she ' s helping to look after — and
with the handsome and brilliant Mark
Cameron, owner of the troubled Kalkari
Wines estate. What will happen when
Mark ' s estranged wife, the tempestuous
Isabella, returns? Will Rose find a future in the
Shingle Valley, or will she be forced to leave?

IBM® DB2® Tools for z/OS® support and
take advantage of the latest versions of DB2 for
z/OS. These tools are integral for the
administration of the DB2 for z/OS environment
and for optimization of data performance. In
addition, the IBM portfolio addresses additional
client requirements in the areas of data

governance and version upgrade acceleration. Underlying the operation of any database management system are the utilities. With the number of database objects growing exponentially, managing utility jobs, meeting service level agreements (SLAs), and ensuring recoverability can be overwhelming. IBM offers DB2 Tools solution packs that assist in the DB2 utilities management process. Solution packs combine several products into a single consolidated solution providing everything necessary to ensure the execution of a set of database administration functions. The goals are to reduce the operational complexity and reduce cost. The objective of this IBM Redbooks® publication is to document the added value in terms of productivity and performance for database administrators when using the IBM DB2 Utilities Solution Pack and the IBM DB2 Fast Copy Solution Pack. We show the functions of the tools provided by the solution packs as used in real-life scenarios and adopting utilities best practices.

Implementing IBM CICS JSON Web Services for Mobile Applications NYU Press

The International Conference on Communications, Management, and Information Technology (ICCMIT ' 16) provides a discussion forum for scientists, engineers, educators and students about the latest discoveries and realizations in the foundations, theory, models and applications of systems inspired on nature, using computational intelligence methodologies, as well as in emerging areas related to the three tracks of the conference: Communication Engineering, Knowledge, and Information Technology. The best 25 papers to be included in the book will be carefully reviewed and selected from numerous submissions, then revised and expanded to provide deeper insight into trends shaping future ICT.

This IBM® Redbooks® publication provides information about how you can connect mobile devices to IBM Customer Information Control System (CICS®) Transaction Server (CICS TS), using existing enterprise services already hosted on CICS, or to develop new services supporting new lines of business. This book describes the steps to develop, configure, and deploy a mobile application that connects either directly to CICS TS, or to CICS via IBM Worklight® Server. It also describes the advantages that your organization can realize by using Worklight Server with CICS. In addition, this Redbooks publication provides a broad understanding of the new CICS architecture that enables you to make new and existing mainframe applications available as web services using JavaScript Object Notation (JSON), and provides support for the transformation between JSON and application data. While doing so, we provide information about each resource definition, and its role when CICS handles or makes a request. We also describe how to move your CICS applications, and business, into the mobile space, and how to prepare your CICS environment for the following scenarios: Taking an existing CICS application and exposing it as a JSON web service Creating a new CICS application, based on a JSON schema Using CICS as a JSON client This Redbooks publication provides information about the installation and configuration steps for both Worklight Studio and Worklight Server. Worklight Studio is the Eclipse interface that a developer uses to implement a Worklight native or hybrid mobile application, and can be installed into an Eclipse instance. Worklight Server is where components developed for the server side (written in Worklight Studio), such as adapters and custom server-side authentication logic, run. CICS applications and their associated data constitute some of the most valuable assets owned by an enterprise. Therefore, the protection of these assets is an essential part of any CICS mobile project. This Redbooks publication, after a review of the main mobile security challenges, outlines the options for securing CICS JSON web services, and reviews how products, such as Worklight and IBM DataPower®, can help. It then shows examples of security configurations in CICS and Worklight.

Using the IBM Security Framework and IBM Security Blueprint to Realize Business-Driven Security IBM Redbooks

This volume offers empirically based insights and findings on the question of how human service organizations are reacting to the increasing need for greater impact, effectiveness, and performance. As demand for increased impact outstrips our knowledge of how best to achieve these goals, the book's contributors discuss the innovative strategies being used to ensure that multiplex goals are being met and the degree to which client and staff concerns are being sacrificed for the organizational bottom line. Taken together, these discussions demonstrate that specific management strategies and collaboration based on trust and consideration of mission

may help improve the quality of some services; however, many of the pressures which organizations and managers experience are resulting in lower staff morale, compromised missions, and inefficiencies. This book will be of interest to those researching human service agencies, as well as those with a broader concern for how organizations react to doing more with less. This book was originally published as a special issue of the Human Service Organizations journal.

Typical deployment architectures introduce challenges to fully using the shared metadata platform across products, environments, and servers. Data privacy and information security requirements add even more levels of complexity. IBM® InfoSphere® Information Server provides a comprehensive, metadata-driven platform for delivering trusted information across heterogeneous systems. This IBM Redbooks® publication presents guidelines and criteria for the successful deployment of InfoSphere Information Server components in typical logical infrastructure topologies that use shared metadata capabilities of the platform, and support development lifecycle, data privacy, information security, high availability, and performance requirements. This book can help you evaluate information requirements to determine an appropriate deployment architecture, based on

guidelines that are presented here, and that can fulfill specific use cases. It can also help you effectively use the functionality of your Information Server product modules and components to successfully achieve your business goals. This book is for IT architects, information management and integration specialists, and system administrators who are responsible for delivering the full suite of information integration capabilities of InfoSphere Information Server. This IBM® Redbooks® publication will help you design and manage an end-to-end, extended distance connectivity architecture for IBM System z®. This solution addresses your requirements now, and positions you to make effective use of new technologies in the future. Many enterprises implement extended distance connectivity in a silo manner. However, effective extended distance solutions require the involvement of different teams within an organization. Typically there is a network group, a storage group, a systems group, and possibly other teams. The intent of this publication is to help you design and manage a solution that will provide for all of your System z extended distance needs in the most effective and flexible way possible. This book

introduces an approach to help plan, optimize, and maintain all of the moving parts of the solution together.

Sometimes the one you never got over is just a
friend request away ... There were no cell phones
or internet or google when she left me and I never
knew why she walked away from our
relationship. I loved her, like head-over-heels
crazy loved her. And when she walked out on me
at the end of our freshman year, without even a
goodbye, she broke my heart. So, I got a surprise
gift the other night at my birthday party, an old
college friend casually mentioned he saw her on
Facebook. Best present I've received in over
twenty years. Now, I'm finally going to get my
answer. She owes me an explanation as to why
she left ... Damn, I loved her.

I was having such a crappy morning
at work and then his email arrived. It was a friend
request and to say I was shocked would be an
understatement. A lifetime has passed since we
were last in contact. But just seeing his name on
my computer screen, made me react in a way I
thought I was no longer capable of, you see, I
have never gotten over loving him, even though
he betrayed me. And so begins the saga of
Schooner Moore and Mia Silver, lovers separated
after their first year of college and not reunited
again for over twenty years. But two decades was
not long enough for their flame to be
extinguished and reuniting could cost them
everything.
