Human Anatomy and Physiology Laboratory Manual Pearson

This full-color atlas is designed for all students taking separate or integrated courses in human anatomy and physiology. This atlas can accompany and augment any human anatomy, human physiology or combined human anatomy and physiology textbook. It is designed to be of particular value to students in a laboratory situation and could either accompany a laboratory manual or, in certain courses, it could serve as the laboratory manual. Great care has gone into the preparation of this photographic atlas to provide students with a complete set of photographs for each of the human body systems. Cat, fetal pig, and rat dissection are also included for those students who have the opportunity to do similar dissections as part of their laboratory requirement. In addition, photographs of a sheep heart dissection are also included. A visual balance is achieved between the various levels available to observe the structure of the body. Completely labeled, informative figures are depicted clearly and accurately. The terms used in this atlas are those that are approved and recommended by the Basle Nomina Anatomica (BNA). Some of the changes for this new edition include a new art program, new vertebrate dissection images (new specimens were dissected to obtain better quality photographs of the muscular and organ systems), and a new full page heart valve/cardiatic cycle figure.

For the two-semester A&P laboratory course. Fully engage students in their A&P Lab experience Human Anatomy & Physiology Laboratory Manual: Making Connections distinguishes itself from other A&P lab manuals by focusing on and addressing the most common teaching challenges in the lab--getting students to engage in the lab, to prepare for the lab, and to apply concepts in the lab. Catharine Whiting's active learning approach incorporates a rich variety of hands-on activities and guided questions to get students engaged and asking questions. The 2nd Edition provides new features, such as "What You Need to Know Before You Start this Unit" at the beginning of each Unit and new Pre-Lab Video Coaching Activities to help students learn what they need to review before lab. Developed as the companion to Erin Amerman's Human Anatomy & Physiology, 2nd Edition, Whiting's lab manual reflects the same superb art program and terminology found in the Amerman textbook. Human Anatomy & Physiology Laboratory Manual: Making Connections, 2nd Edition is available in three versions for your students: Main, Cat and Fetal Pig. The Cat and Fetal Pig versions are identical to the Main version except that they include seven additional cat dissection and nine additional fetal pig dissection exercises, respectively, at the back of the lab manual. Anatomy & Physiology , Fourth Edition answers the demand for a leaner version of Elaine Marieb and Katja Hoehn's top-selling Human Anatomy & Physiology. This streamlined text has removed coverage of pregnancy, heredity, and the developmental aspects of various body systems, while keeping basic themes such as homeostatic imbalances strategically in place. Marieb draws on her career as an A&P professor and her experience as a part-time nursing student, while Hoehn relies on her medical education and classroom experience to explain concepts and processes in a meaningful and memorable way. The most significant revision to date, the Fourth Edition makes it easier for you to learn key concepts in A&P. The new edition features a whole new art program that is not only more visually dynamic and vibrant than in previous editions but is also much more pedagogically effective for today's students, including new Focus figures, which guide you through the toughest concepts in A&P. The book has been edited to make it easier than ever to study from and navigate, with integrated objectives, new

concept check questions, and a new design program.
