This full-color manual is designed for students with minimal backgrounds in science who are pursuing careers in allied health fields. Designed to support the thirteenth edition of Hole's Essentials of Human A&P by Shier, Butler, and Lewis, this manual contains 49 laboratory exercises and reports, which are integrated closely to the textbook. Exercises are planned to illustrate and review the anatomical and physiological facts and principles presented in the text and to help students investigate some of these ideas in greater detail.

Human Anatomy & Physiology Laboratory Manual Pearson College Division

This concise lab manual is designed for those wanting a briefer and less expensive lab manual than traditionally available for the two-semester anatomy & physiology lab course and who also want their readers to develop critical thinking skills in the lab. Laboratory Investigations in Anatomy & Physiology, Cat Version, Second Edition contains only 31 exercises, providing just the core exercises done in most lab courses, in contrast to the 40 or 50 lab exercises included in the leading anatomy & physiology lab manuals. Through the use of frequent and engaging Questions to Consider, author Stephen Sarikas helps readers think about complex ideas and make connections between concepts. By challenging readers not only to observe but also to interpret what they experience in the lab, he gives readers an investigative experience that ensures they will retain what they have learned—a tremendous benefit to any reader going into a healthcare-related career. The Second Edition features all-new activities on surface anatomy, a fascinating new feature on forensic science, enlarged illustrations with more deeply contrasting colors to make learning easier, a new website for practice and quizzing, and the new Practice Anatomy Lab (PAL™) 2.0 anatomy practice and assessment tool. Main and Pig Versions of this lab manual are also available.
