Skin anatomy refers to the structure of the skin, which consists of two principal parts: the outer, thinner portion which is called the epidermis and the inner, thicker portion which is known as the dermis. Alternatively, skin physiology is the subdivision of physiology which concerns the functions of the skin including the regulation of body temperature, protection, sensation, excretion, immunity, blood reservoir and the synthesis of Vitamin D. There are more than a thousand conditions that may affect the

skin but some of the most common skin diseases include rashes, bacterial infections, fungal infections, parasitic infections, pigmentation disorders, tumours and cancers and skin diseases that result from trauma. This book gathers the latest research from around the globe in this field.

Toxicology and Biomedical Research presents the detailed systematic anatomy of the rat, with a focus on toxicological needs. Most large works dealing with the laboratory rat provide a chapter on anatomy, but fall far short of the detailed account in this book which also focuses on the needs of toxicologists and others who use the rat as a laboratory animal. The book includes detailed guides on dissection methods and the location of specific tissues in specific organ systems. Crucially, the book includes classic illustrations from Miss H. G. Q. Rowett, along with new color photo-micrographs. Written by two of the top authors in their fields, this book can be used as a reference guide and teaching aid for students and researchers in toxicology. In addition, veterinary/medical students, researchers who utilize animals in biomedical research, and researchers in zoology, comparative anatomy, physiology and pharmacology will find this book to be a great resource. Illustrated with over 100 black and white

and color images to assist understanding Contains detailed descriptions and explanations to accompany all images, thus helping with self-study Designed for toxicologic research for people from diverse backgrounds, including biochemistry, pharmacology, physiology, immunology and general biomedical sciences
