Goode's World Atlas Routledge

This extensively revised and updated fourth edition not only examines the new geographical patterns forming within and between cities, but also investigates the way geographers have sought to make sense of this urban transformation. It is structured into three sections: 'contexts', 'themes' and 'issues' that move students from a foundation in urban geography through its major themes to contemporary and pressing issues. The text critically synthesizes key literatures in the following areas: the urban world changing approaches to urban geography urban form and structure economy and the city urban politics planning, regeneration and urban policy cities and culture architecture and urban landscapes images of the city experiencing the city housing and residential segregation transport and mobility in cities sustainability and the city. The fourth edition combines the topicality and accessibility of previous editions with extensive new material, including many new chapters such as the urban world and politics, housing and Residential Segregation, and transport in cities, as well as a wealth of international case studies, extending its range of coverage across the field. This book features enhanced pedagogy including a range of new illustrations and tables, a list of key ideas for each chapter, end of chapter essay questions and project activities, and annotated further reading from books, journals and websites. Written in an engaging, student friendly style, this is an essential read for students and scholars of Urban Geography.

Visualizing Human Geography Prentice Hall

Introducing Human Geographies is the leading guide to human geography for undergraduate students, explaining new thinking on essential topics and discussing exciting developments in the field. This new edition has been thoroughly revised and updated and coverage is extended with new sections devoted to biogeographies, cartographies, mobilities, non-representational geographies, population geographies, public geographies and securities. Presented in three parts with 60 contributions written by expert international researchers, this text addresses the central ideas through which human geographers understand and shape their subject. Part I: Foundations engages students with key ideas that define human geography 's subject matter and approaches, through critical analyses of dualisms such as local-global, society-space and human-nonhuman. Part II: Themes explores human geography 's main sub-disciplines, with sections devoted to biogeographies, cartographies, cultural geographies, development geographies, economic geographies, environmental geographies, historical geographies, political geographies, population geographies, social geographies, urban and rural geographies. Finally, Part III: Horizons assesses the latest research in innovative areas, from mobilities and securities to non-representational geographies. This comprehensive, stimulating and cutting edge introduction to the field is richly illustrated throughout with full colour figures, maps and photos. These are available to download on the companion website, located at www.routledge.com/9781444135350.

Fundamentals of the Physical Environment Routledge

Economic and Social Geography reviews developments in the study of economic and social geography and brings together in a single volume work which is dispersed in many specialist textbooks. An attempt has been made to achieve a balance between oversimplification and over-elaboration, and to present essential concepts in a clear, concise manner. The book contains 25 chapters organized into five parts. Part One deals with the study of economic and social geography, including approaches to the study of human geography and environmental perception and behavior. Part Two on population geography covers topics such as population geography, population change, and population growth. Part Three on economic geography includes discussions of transportation, agriculture, and mineral resources. Part Four on settlement geography examines urbanization, the internal structure of towns and cities, and rural settlement. Part Five is devoted to urban and rural planning, problems of economic development, and resources. This book, together with its companion volume, Physical

Geography Made Simple, should be of value to a variety of people. First, to those who are coming to academic geography for the first time, especially to those studying for GCE Advanced Level or ONC/OND examinations. It should also provide a concise introduction to first-year courses in further and higher education, including degree courses with a geography component, HNC/HND, and Certificate in Education courses.
