"The best education in grand strategy available in a single volume . . . a book that should be read by every American leader or would-be leader." —The Wall Street Journal A master class in strategic thinking, distilled from the legendary program the author has co-taught at Yale for decades John Lewis Gaddis, the distinguished historian of the Cold War, has for almost two decades co-taught grand strategy at Yale University with his colleagues Charles Hill and Paul Kennedy. Now, in *On Grand Strategy*, Gaddis reflects on what he has learned. In chapters extending from the ancient world through World War II, Gaddis assesses grand strategic theory and practice in Herodotus, Thucydides, Sun Tzu, Octavian/Augustus, St. Augustine, Machiavelli, Elizabeth I, Philip II, the American Founding Fathers, Clausewitz, Tolstoy, Lincoln, Wilson, Franklin D. Roosevelt, and Isaiah Berlin. *On Grand Strategy* applies the sharp insights and wit readers have come to expect from Gaddis to times, places, and people he's never written about before. For anyone interested in the art of leadership, *On Grand Strategy* is, in every way, a master class.

Progress in Geography International Reviews of Current Research Prentice Hall

This four-volume set begins with a discussion of the histories and geographies of geographical knowledge. While human geography's succession of "theoretical turns" is important in understanding the discipline, this work also demonstrates the multiple, textured ways in which geography explains how we represent ourselves and others. Volumes III and IV focus on the central concerns of the discipline: Space (in relation to productions, practices and performances) and Nature (in relation to distinctions between "culture" and "nature").

Human Geography SAGE Publications Limited

Across the disciplines, the study of space has undergone a profound and sustained transformation. Space, place, mapping, and geographical imaginations have become commonplace topics in a variety of analytical fields in part because globalization has accentuated the significance of location. While this transformation has led to a renaissance in human geography, it also has manifested itself in the humanities and other social sciences. The purpose of this book is not to announce that space is significant, which by now is well known, but to explore how space is analyzed by a variety of disciplines, to compare and contrast these approaches, identify commonalities, and explore how and why differences appear. The volume includes works by 13 scholars from a variety of geographical regions and disciplines. The chapters combine up-to-date literature reviews concerning the role of space in each discipline and several offer original empirical analyses. Some chapters are concerned with Geography while others explore the role of space in contemporary Anthropology, Sociology, Religion, Political Science, Film, and Cultural Studies. The introduction surveys the development of the spatial turn across the fields under consideration. Despite frequent reference to the spatial turn, this is the first volume to explicitly address how theory and practice concerning space, is used in a variety of fields from diverse conceptual perspectives. This book will appeal to everyone conducting conceptual and theoretical research on space, not simply in Geography, but in related fields as well.

?Filling an enormous gap in the geographic literature, here is a terrific book that shows us how to think about and practice human geographic research? - Professor Jennifer Wolch, University of Southern California `Practising Human Geography lucidly, comprehensively, and sometimes passionately shows why methodology matters, and why it is often so hard. To choose a method is to choose the kind of geographical values one wants to uphold. You need to get it right. These authors do? - Trevor Barnes, University of British Columbia `Practising Human Geography is a godsend for students. Written in an accessible and engaging style, the book demystifies the study of geographical methodology, offering a wealth of practical advice from the authors' own research experience. This is not a manual of approved geographical techniques. It is a reflexive, critical and highly personal account, combining historical depth with up-to-the-minute examples of research in practice. Practising Human Geography is a comprehensive and theoretically informed introduction to the practices of fieldwork, data collection, interpretation and writing, enabling students to make sense of their own data and to develop a critical perspective on the existing literature. The book makes complicated ideas approachable through the effective use of case studies and a firm grasp of contemporary debates? - Peter Jackson, Professor of Human Geography, University of Sheffield Practising Human Geography is a critical introduction to key issues in the practice of human geography, informed by the question ?how do geographers do research?? In examining those methods and practices that are essential to doing geography, the text presents a theoretically-informed discussion of the construction and interpretation of geographical data - including: the use of core research methodologies; using official and non-official sources; and the interpretative role of the researcher. Framed by an overview of how ideas of practising human geography have changed, the twelve chapters offer a comprehensive and integrated overview of research methodologies. The text is illustrated throughout with text boxes, case studies, and definitions of key terms. Practising Human Geography will introduce geographers - from undergraduate to faculty - to the core issues that inform research design and practice.

An Introduction to Human Geography Greenwood

Approaches to Human Geography is the essential student primer on theory and practice in human geography. It is a systematic review of the key ideas and debates informing post-war geography, explaining how those ideas work in practice. In three sections, the text provides:

· A comprehensive contextualising essay: Introducing Philosophies, People and Practices · Philosophies: written by the principal proponents, easily comprehensible accounts of: Positivist Geographies; Humanism; Feminist Geographies; Marxism; Structuration Theory; Behavioral Geography; Realism; Post Structuralist Theories; Actor-Network Theory; and Post Colonialism · People: prominent geographers explain events that formed their ways of knowing; the section offers situated accounts of theory and practice by, for example: David Ley; Linda McDowell; and David Harvey · Practices: applied accounts of Quantification, Evidence and Positivism; Geographic Information Systems; Humanism; Geography, Political Activism, and Marxism; the Production of Feminist Geographies; Poststructuralist Theory; Environmental Inquiry in a Postcolonial World; Contested Geographies · Student Exercises and Glossary Avoiding jargon - while attentive to the rigor and complexity of the ideas that underlie geographic knowledge - the text is written for students who have not met philosophical or theoretical approaches before. This is a beginning guide to geographic research and practice. Comprehensive and accessible, it will be the core text for courses on Approaches to Human Geography; Philosophy and Geography; and the History of Geography; and a key resource for students beginning research projects.
