In Human Evolution, Robert Winston explores and explains the inescapable fact that human behaviour has its origins in our ancestry on the savannah of Africa. He goes on to explain various aspects of human behaviour originated with ancient humans and our pre-human ancestors and how our primitive instincts affect human behaviour today.

---

In Human Instinct, which accompanies a BBC1 television series, Robert Winston takes us to the forefront of modern science, exploring our instincts and gaining a deeper insight into the wonderful complexity of human nature.

Human Instinct How Our Primeval

How our primeval impulses shape our modern lives. From caveman to modern man ... Few people doubt that humans are descended from the apes; fewer still consider, let alone accept, the psychological implications. But in truth, man not only looks, moves and breathes like an ape, he also thinks like one.

Somehow the spontaneity and liveliness of the program did not carry into the book. I did enjoy the book, but it seemed more like a jumble of facts than a story, or maybe it lacked a central focus. Human instinct was certainly the topic, but that seemed a bit too loosely the focus. The British style of writing had an impact on me.

Human Nature: Essentially Selfish and Self-Interested?

Excerpt from Human Instinct: How Our Primeval Impulses Shape Our Modern Lives, by Lord Robert Winston (Bantam Press, 2003). Reprinted with permission from the author. From Chapter 7: Co-operation and Altruism. Selfish gene theory. Some species come together simply to mate; they spend most of their time as lone individuals, feeding, sleeping, sheltering and killing as self-sufficient organisms.
