"In the tradition of the best immersive journalism." -A.J. Jacobs, author of *The Year of Living Biblically* A bold examination of how Paleolithic wisdom could solve our 21st century problems Jessica Carew Kraft, an urban wife and mom of two, was firmly rooted in the modern world, complete with a high-powered career in tech and the sneaking suspicion that her lifestyle was preventing her and her family from truly thriving. Determined to find a better way, Jessica quit her job and set out to learn about "rewilding" from people who reject the comforts and convenience of civilization by using ancient tools and skills to survive. Along the way, she learned how to turn sticks into fire, stones into axes, and bones into tools for harvesting wild food—and found an entire community walking the path back from our technology-focused, anxiety-ridden way of life to a simpler, more human experience. Weaving deep research and reportage with her own personal journey, Jessica tells the remarkable story of the potential benefits rewilding has for us and our planet, and questions what it truly means to be a human in today's world. For readers of *A Hunter-Gatherer's Guide to the 21st Century* and *Hunt, Gather, Parent, Why We Need to Be Wild* is a thought-provoking, unforgettable narrative that illuminates how we survived in the past, how we live now, and how each of us can choose to thrive in the years ahead. "Kraft shows us how we could all benefit from being a little less civilized." -Tiffany Shlain, author of *24/6: The Power of Unplugging One Day a Week*

A New York Times Notable Book of 2014 We are doomed to repeat history if we fail to learn from it, but how are we affected by the forces that are invisible to us? What role does Neanderthal DNA play in our genetic makeup? How did the theory of eugenics embraced by Nazi Germany first develop? How is trust passed down in Africa, and silence inherited in Tasmania? How are private companies like Ancestry.com uncovering, preserving and potentially editing the past? In *The Invisible History of the Human Race*, Christine Kenneally reveals that, remarkably, it is not only our biological history that is coded in our DNA, but also our social history. She breaks down myths of determinism and draws on cutting - edge research to explore how both historical artefacts and our DNA tell us where we have come from and where we may be going.

Dr. Lengel offers a thought provoking twist on Aesop ' s Hare-Tortoise fable reframing it as a Human Race pitting our Hare-brained heads against our Tortoise-inspired hearts. As we run faster and faster in our Hare-like pursuits of wealth, power and status, we are leaving no place for the slow and steady Tortoise to speak for our humanity. As a result, the author poses the possibility we are creating a world with our intellects and technology that we can ' t relate to emotionally and spiritually. We might be outrunning our humanity and setting the stage for the Hare to win this human race by default. Our inability to engage each other in civil and respectful conversations, the hate and violence infecting our culture and leadership failures in organizations might be evidence this sinister end is fast approaching. This book is a hard hitting and at times poetic invitation to step back from our busy lives, sit with the author on his front porch, and question our lives and work. It is an inspirational reminder of Mahatma Gandhi ' s warning that " there is more to life than simply increasing its speed. " In a conversational format, Dr. Lengel guides us down a hopeful path forward – a path illuminated by what he calls divergent thinking. His words are a ' siren call ' to wake up and realize we can ' t afford Hare-brained progress at the cost of our souls. We need A Place for T in our lives ' now ' , to account for the unaccountable while we still have time!

"Kyung-Man Kim offers a comprehensive inventory of the obstacles the most powerful and influential thinkers of our time tried to overcome, the questions they asked without finding good answers, and the questions they've overlooked or avoided. No one concerned with the ethical impact of knowledge and the role it may play in winning the case of human freedom can neglect Kyung-Man Kim's analysis." -Zygmunt Bauman "This is a powerful book, compelling for every reader who wants to know how current sociological theory can be used to change, not just interpret, the social world. Kyung-man Kim offers masterful readings of the main theoretical formations of the last century." -Norman K. Denzin, University of Illinois "A lucid exposition and critique of Bourdieu, Giddens, and Habermas, and of the phenomenological ethnographies of Garfinkel and the ethnomethodologists who provided their starting point. Kim, who has honed his skills in his acute contributions to the hyper-reflexive sociology of scientific knowledge, now

successfully takes on the big game of the emancipatory theory world. -Randall Collins, University of Pennsylvania What binds the theoretical work of Pierre Bourdieu, Anthony Giddens, and Jurgen Habermas? Although these and other contemporary theorists offered major critiques of society, they stopped short of plausible proposals to achieve the liberation of individuals and societies. Kyung-Man Kim offers a new reading of contemporary critical theorists and explains how, by reading them together, we may find a practical basis for progressive social change.

Disrupting the Generational Cycle of Distrust in America's 600 Year Cultural War You are about to scan a high-resolution MRI of the psychological forces generating discord and disrupting the American democratic experiment. Absolute-mindedness is not a personality type, clinical disorder or social psychopathology, but an archaic "trust" adaptation giving rise to much of today's populist frustration and anger. When trust is disrupted early in life -- complexity, ambiguity, and disappointment fixate on a trust-mistrust duality -- good-bad, right-wrong, us versus them. Republicans and Democrats are undergoing cultural mitosis. An evolutionary social and political speciation driving us toward an autocratic America. Constitutional "originalists" were raised in parental originalism emphasizing principle and discipline over empathy and reasoning. Solo mass shootings are a predictable abandonment pattern over the course of America's history of gun rights and vigilante ethos. Conspiracy theories are repetitive information diffusion in dense social networks during times of social unrest, triggering individuals pre-wired for resignation, grievance, and revenge. The modern dictator: a "dark triad" of malignant narcissism, psychopathy, and Machiavellianism. American Absolutism explores what happens when human adaptation loses viability as it comes face-to-face with an exponentially evolving complexity that is the modern human condition.

Hiroshima is the story of six people—a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest—who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

The chilling story of Stalin's crimes against humanity Between the early 1930s and his death in 1953, Joseph Stalin had more than a million of his own citizens executed. Millions more fell victim to forced labor, deportation, famine, bloody massacres, and detention and interrogation by Stalin's henchmen. Stalin's Genocides is the chilling story of these crimes. The book puts forward the important argument that brutal mass killings under Stalin in the 1930s were indeed acts of genocide and that the Soviet dictator himself was behind them. Norman Naimark, one of our most respected authorities on the Soviet era, challenges the widely held notion that Stalin's crimes do not constitute genocide, which the United Nations defines as the premeditated killing of a group of people because of their race, religion, or inherent national qualities. In this gripping book, Naimark explains how Stalin became a pitiless mass

killer. He looks at the most consequential and harrowing episodes of Stalin's systematic destruction of his own populace—the liquidation and repression of the so-called kulaks, the Ukrainian famine, the purge of nationalities, and the Great Terror—and examines them in light of other genocides in history. In addition, Naimark compares Stalin's crimes with those of the most notorious genocidal killer of them all, Adolf Hitler.

For more than a million years, man's utter dependence on technology has been producing a host of intricate problems. For example, we steadily reduce the need for human labor while finding ways to increase life expectancy. We mass produce the automobile without grasping the harsh effects it leaves on the environment. The Human Legacy concerns the evolution and development of man—physically, socially, psychologically—into the latest version of the species we see around us today. The author paints an intriguing picture of man, living in complex societies and trying to solve the unanticipated consequences of action.

We all love stories--whether printed, passed down orally from generation to generation, or made into films. We love stories whether they are fictional, true, mythical, or legendary. Stories are part of our human history, and they help us understand being human. But there is one story that underpins all other stories--the story of why we exist. All great human stories must interact with

---

this story. His Story explores this fundamental story by retelling the story of the Bible. His Story tells the Biblical story of how God has opened up a doorway into our universe and how this impacts the metanarrative of all of our lives. If you want to read the overarching story of the Bible in one short book, then His Story is for you. If you want to know the backstory of your life, His Story is for you. His Story is simply written, but doesn't oversimplify. It is a book for people who might call themselves Christians, but also for all those who are curious about the ultimate story. His Story--the story of why we are here.

Born out of the Israeli occupation of the South of Lebanon, the political armed group Hizbullah is a powerful player within both Lebanon and the wider Middle East. Understanding how Hizbullah has, since the 1980s, developed its own reading of the nature of the Lebanese state, national identity and historical narrative is central to grasping the political trajectory of the country. By examining the ideological production of Hizbullah, especially its underground newspaper Al Ahd, Bashir Saade offers an account of the intellectual continuity between the early phases of Hizbullah's emergence onto the political stage and its present day organization. Saade argues here that this early intellectual activity, involving an elaborate understanding of the past and history had a long lasting impact on later cultural production, one in which the notion and practice of Resistance has been central in developing national imaginaries.

Dialogues Across Civilizations sets the histories of China and Europe alongside one another. Each chapter stands as an essay that imaginatively places historical individuals and events in proximity to one another and explores a specific topic, gender relations, rural politics, artistic renderings of nature, to name a few, through the stories of persons who reflected on similar questions but in different social and cultural settings. Through this juxtaposition, Chinese and European civilizations illuminate each other's achievements, problems, and limitations in a range of areas from urban history to religious faith. Privileging neither Europe nor China, this work offers an innovative move away from relativism and multiculturalism towards an analysis that focuses on relationships between social choices and consequences. As a result, both common and divergent perspectives on the human condition emerge for discussion. Drawing upon a rich literature of cross-societal studies, Dialogues Across Civilizations generates reflection on themes central to the study of world history as well as European and Asian history.
