Wiley CPA Exam Review 2008

Cambridge University Press

This textbook is intended as a textbook for one-semester, introductory computer science courses aimed at undergraduate students from all disciplines. Self-contained and with no prerequisites, it focuses on elementary knowledge and thinking models. The content has been tested in university classrooms for over six years, and has been used in summer schools to train university and high-school teachers on teaching introductory computer science courses using computational thinking. This book introduces computer science from a computational thinking perspective. In computer science the way of thinking is characterized by three external and eight internal features, including automatic execution, bit-accuracy and abstraction. The book is divided into chapters on logic thinking, algorithmic thinking, systems thinking, and network thinking. It also covers societal impact and responsible computing material – from ICT industry to digital economy, from the wonder of exponentiation to wonder of cyberspace, and from code of conduct to best practices for independent work. The book's structure encourages active, hands-on learning using the pedagogic tool

Bloom's taxonomy to create computational solutions to over 200 problems of varying difficulty. Students solve problems using a combination of thought experiment, programming, and written methods. Only 300 lines of code in total are required to solve most programming problems in this book.

Human language technologies continue to play an important part in the modern information society. This book contains papers presented at the fifth international conference 'Human Language Technologies – The Baltic Perspective (Baltic HLT 2012)', held in Tartu, Estonia, in October 2012. Baltic HLT provides a special venue for new and ongoing work in computational linguistics and related disciplines, both in the Baltic states and in a broader geographical perspective. It brings together scientists, developers, providers and users of HLT, and is a forum for the sharing of new ideas and recent advances in human language processing, promoting cooperation between the research communities of computer science and linguistics from the Baltic countries and the rest of the world. Twenty long papers, as well as the posters or demos accepted for presentation at the conference, are published here. They cover a wide range of topics: morphological disambiguation, dependency syntax and valency, computational semantics, named entities, dialogue modeling, terminology extraction and management, machine translation, corpus and parallel corpus compiling, speech modeling and multimodal communication. Some of the papers also give a general overview of the state of the art of human language technology and language resources in the Baltic states. This book will be of interest to all those

whose work involves the use and application of computational linguistics and related disciplines.

This lively, comprehensive introduction to human behavior in the social environment offers an integrative approach to biopsychosocial case formulations of current and developmental human behavior concerns. The sixth edition builds on prior efforts in promoting integrative assessments by adopting a specific method for completing case formulations that students apply to case studies in the book's developmental chapters. This innovation provides students with a bridge to the core competencies and recommended practice behaviors outlined in the 2015 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE), thus helping them connect foundation knowledge with practice concerns. Guidelines for practice and relevant assessment tools are identified for specific life tasks and for each phase of biopsychosocial development. This edition also offers concrete methods for the translation of developmental research to assessment practices. The aim of this book is threefold. First to put in one place for the convenience of both scholars and practitioners the basic data on redistricting practices in democracies around the world. Remarkably, this data has never before been collected. Second, to provide a series of short case studies that look in more detail at particular countries with regard to the institutions and practices that have evolved for redistricting and the nature of the debates that have arisen. Third, to begin to look in comparative perspective at the consequences of alternative redistricting mechanisms and at the tradeoffs among competing redistricting criteria. This volume has contributions from some of the leading specialists on redistricting in the world. The chapters reflect a mix of country-specific material, chapters that are broadly comparative, and chapters whose contributions are more methodological in nature. The chapters in this volume provide an indispensable introduction to the institutions, practices, and consequences of boundary delimitation around the world. Comparative Politics is a series for students and teachers of political science that deals with contemporary issues in comparative government and politics. The General Editors are David M. Farrell, Jean Monnet Chair in European Politics and Head of School of Social Sciences, University of Manchester and Alfio Mastropaolo, University of Turin. The series is published in association with the European Consortium for Political Research. Wiley CPA Exam Review 2010, Business Environment and Concepts EduGorilla

Technologies – The Baltic Perspective This book presents a comprehensive, state-of-the-art treatment of the acquisition of

Indo- and Non-Indo-European languages in various contexts, such as L1, L2, L3/Ln, bi/multilingual, heritage languages, pathology as well as language impairment, and sign language acquisition. The book explores a broad mix of methodologies and issues in contemporary research. The text presents original research from several different perspectives, and provides a basis for dialogue between researchers working on diverse projects with the aim of furthering our understanding of how languages are acquired. The book proposes and refines new theoretical constructs, e.g. regarding the complexity of linguistic features as a relevant factor forming children's, adults' and bilingual individuals' acquisition of morphological, syntactic, discursive, pragmatic, lexical and phonological structures. It appeals to students, researchers, and professionals in the field.

Empowerment Series: Human Behavior in the Social Environment: A Multidimensional Perspective Oxford University Press

This title was first published in 2003. The authors of the essays in this collection, all internationally recognised refugee scholars and practitioners, look at the controversial "hot" topic of refugee rights. They consider whether, 50 years after its agreement, the Refugees' Convention can provide an adequate framework for protection. In particular, the authors address: the effect of globalization upon the human rights of asylum seekers and refugees; the efficacy of the Convention as an instrument of international law; the role of the UNHCR; whether NGOs are effective instruments for change; and nationality and citizenship issues. They also consider alternatives and options for solutions to the global refugee problem.

Reflecting the idea that social justice is a primary mission of the social work profession, this text provides a thorough grounding in policy analysis -- with extensive coverage of policy practice and a unique emphasis on the human dilemmas inherent in the pursuit of social justice. Author Amanda Barusch introduces several philosophical perspectives on what constitutes social justice, and identifies values and assumptions reflected in contemporary policy debates. She makes policy personal, introducing people whose lives are influenced by U.S. policies, as well as those who have shaped these policies. Part of the Brooks/Cole Empowerment Series, FOUNDATIONS OF SOCIAL POLICY, 6th

Edition, integrates the core competencies and practice behaviors outlined in the 2015 Educational Policy and Accreditation Standards (EPAS) set by the Council on Social Work Education (CSWE). Updated throughout, it also features a new chapter on crime and criminal justice.
