*ANATOMY PRE TEST* CRC Press  
There has been a marked change in examination strategy over the last five years; EMQs (extended matching questions) are popular with

tutors and students alike as they present a more realistic view of a student's ability to apply his or her knowledge in a clinical situation. The new edition of MCQs in Physiology has been subject to a complete overhaul to become MCQs and EMQs in Physiology. This reflects the current methods of examination techniques and will provide the student with a complete revision resource book. Packed with MCQs and EMQs along with clear and simple explanations

---

of each answer, this book covers all the main physiological systems. The questions stretch from basic to applied and interpretative and are written with the modern integrated syllabus firmly in mind. Presented alongside other core revision books such as EMQs in Clinical Medicine this book will soon be seen as a must-have for any medic's shelf.

School Crash Courses presents Human Physiology: Written by experts and authorities in the field and professionally narrated for easy listening, this crash course is a valuable tool both during school and when preparing for the USMLE, or if you're simply interested in the subject. The audio is focused and high-yield, covering the most important topics you might expect to learn in a typical medical school human physiology course.

Included are both capsule and detailed explanations of critical issues and topics you must know to master this topic. The material is accurate, up to date, and broken down into bite-sized sections. There is a "Q&A" and "key takeaways" section following each topic to review questions commonly tested and drive home key points. In this course, we'll cover the following topics: Basic cell processes Metabolic physiology Endocrine

physiology. The homeostatic mechanisms within each system will be covered. In addition, the functional integration of the physiology of these three organ systems will also be considered. The author of this physiology question-based learning book has taught physiology for more than twenty five years. He is also the pioneer of the physiology quiz,

which he facilitates as quiz master, for which he generates the challenging physiology questions. This book is a distillation of the questions asked at the international editions of the physiology quiz. This physiology question-based learning book will be useful to all students of physiology in medicine, dentistry, pharmacy and other allied health

sciences. This question-based learning text aims to provoke thinking and it should make learning physiology both enjoyable and challenging.
