This edited volume examines the contemporary practice of human trafficking on the African continent. It investigates the scourge of human trafficking in Africa from the broader international and regional perspectives as well as from a country-specific context. Written by a multi-disciplinary panel of academics and practitioners, the book is divided into three sections that highlight a wide range of issues. Section One examines the theoretical and legal challenges of trafficking. Section Two focuses on the regional and nation-state perspectives of human trafficking along with selected cases of trafficking. Section Three highlights the impact of trafficking on youth, with specific attention given to child soldiering and female victims of trafficking. Providing a multi-faceted approach to a problem that crosses multiple disciplines, this volume will be useful to scholars and students interested in African politics, African studies, migration, human rights, sociology, law, and economics as well as members of the diplomatic corps, governmental, intergovernmental, and non-governmental organizations.--

Millions of people around the world are forced to work without pay and under threat of violence. These individuals can be found working in brothels, factories, mines, farm field, restaurants, construction sites and private homes: many have been tricked by human traffickers and lured by false promises of good jobs or education, some are forced to work at gunpoint, while others are trapped by phony debts from unscrupulous moneylenders. The SAGE Handbook of Human Trafficking and Modern-Day Slavery provides a comprehensive, interdisciplinary and global look at the diverse issues surrounding human trafficking and slavery in the post-1945 environment.

Covering everything from history, literature and politics to economics, international law and geography, this Handbook is essential reading for academics and researchers, as well as for policy-makers and non-governmental organisations

Handbook of Research on Present and Future Paradigms in Human Trafficking Springer

"This book is an edited reader that not only discusses the myriad of types of human trafficking (e.g. sex trafficking, labor trafficking, adoption, child soldiers, organ trafficking, servile marriage...) but also the diversity of victims' identities and the relationship to heightened trafficking risk (e.g. race, ethnicity, socioeconomic status, age, sex, sexual orientation, gender identity...). The book emphasizes the multiple types of human trafficking and exploitation evident worldwide, with a particular emphasis on identity-based vulnerabilities and those otherwise marginalized in the research literature. The public discourse associated with human trafficking has led the general public to believe that human trafficking is synonymous with sex trafficking. Although this is the most identified form of human trafficking, it is not the only practice of traffickers. This edited reader reveals the complexity of human trafficking, and lays the groundwork for a shift in the global understanding and policies associated with human trafficking. It brings together experts from multi-disciplinary perspectives and backgrounds to discuss the various types of human trafficking as well as the myriad of victim identities and related vulnerabilities"--

Few subjects elicit greater moral outrage than human trafficking. Media reports of dehumanizing practices such as slavery, abduction, child prostitution, and torture, along with shocking statistics, form the basis of public knowledge. Those who work closely with victims acknowledge the complexity of the issue, and it is this complexity, rather than loose statistics and conjecture, that deserves our attention. With sensitivity and candor, this book addresses the reality of human trafficking in Thailand, dissecting studies, presenting facts, and

dismissing stereotypes. It focuses on the areas of fishing, agriculture, domestic work, sex work, and the trafficking of children, weaving individual narratives and official studies into the wider history of Thailand's changing economy and labor situation. It also details how the Thai government has addressed the issue, reflects on the roots of human exploitation, and suggests a way forward. This book raises much-needed awareness of commonly held misconceptions and clarifies what we know and what we have yet to discover about the trafficking of persons to and from Thailand. Highlights

- Concise and accessible study of the reality of human trafficking in Thailand
- Thorough critical analysis of current policies and public discourse on trafficking
- Details relevant Thai and international laws
- Discusses the relationship between the modern economic system and exploitation
- Analyzes the changing face of the Thai labor market and the impact of industrialization on the Thai population

Human trafficking is currently regarded as a contemporary form of slavery. However, despite many initiatives undertaken over the last two decades to tackle the problem, there seems to be a disproportionate emphasis on the social phenomenon. Trafficking in persons remains a little-explored area in scholarship with many inconsistencies and ambiguities yet to be attended to. Human trafficking is a multifaceted issue that requires a multidisciplinary approach that must be studied and considered thoroughly and with heavy regard to the many layers of the issue. The Handbook of Research on Present and Future Paradigms in Human Trafficking presents a comprehensible view of what constitutes the underpinning of human trafficking, the means of combating it, its moral implications, and offers possible solutions toward curbing its excesses, inconsistencies, and ambiguities. Covering a range of topics such as social change, human rights, and ethics, this major reference work is ideal for researchers, scholars, practitioners, government officials, policymakers, instructors, academicians, and students.

Human Trafficking: A Reference Handbook Springer Nature

The overarching objective of this volume is to discuss and critique the legal regulation of human trafficking in national and transnational context. Specifically, discussion is needed not only with regard to the historical and philosophical points of departure for any criminalisation of trafficking, but also, regarding the societal and social framework, the empirical dimension such as existing statistics in the area, and the need for more data. The book combines descriptive and normative analyses of the crime of trafficking in human beings from a cross-legal perspective.

Notwithstanding the enhanced interest for human trafficking in politics, the public and the media, a critical perspective such as the one pursued herewith has so far been largely absent. Against this background, this approach allows for theoretical findings to be addressed by pointing out and elaborating different, interdisciplinary conflicts and inconsistencies in the regulation of human trafficking. The book discusses the phenomenon of human trafficking critically from various angles, giving it 'shape' and showing how it comes to life in the legal regulation.

During the last decade there has been a considerable increase in the number of studies about human trafficking. This review of research and data on trafficking shows that despite the growing literature on trafficking around the world, relatively few studies are based on extensive or empirical research, and information on the actual numbers of people trafficked remains very sketchy. The book, which includes 9 regional chapters, and 3 chapters dealing with methodological issues, suggests a number of ways in which to enhance research and data on human trafficking. These papers were first discussed at an international conference sponsored by the Italian Government, held in Rome in May 2004.

This book presents a vivid description of the solutions that researchers have discovered for ethical dilemmas that pose themselves at studying disadvantaged, vulnerable and victimized populations. Ethical codes prescribe that the scholar should in all circumstances avoid potential harm, that informed consent is necessary and that the limits of confidentiality should always be respected. However, in the practice of research among women involved in prostitution, illegal immigrant workers, enslaved children, people who sell their organs and all the traffickers thereof, the ethical rules cannot always be followed. This book shows that there is a surprising variety of arguable possibilities in dealing with ethical dilemmas in the field. Authors reflect on concrete experiences from their own fieldwork in a wide variety of settings such as the USA, Singapore, Kosovo and The Netherlands. Some choose to work on the basis of conscientious partiality, others negotiate the rules with their informants and still others purposely break the rules in order to disclose and damage the exploiters. Researchers may find themselves in a vulnerable position. Their experiences, as presented in this volume, will help field workers, university administrators, representatives of vulnerable groups, philosophers of ethics and most of all students to go into the field well-prepared. This is a book that every researcher planning to do fieldwork in the difficult field of hidden, illicit and victimized people should read in advance. Dr. Frank Bovenkerk, Professor (Emeritus), Willem Pompe Institute for Criminal Law and Criminology, Universiteit Utrecht, The Netherlands This book allows a peek in the kitchen of empirical fieldwork, going into not only "best practices," but mistakes made, in a frank, courageous and honest way. By analysing the complex issues surrounding internal and cross-border human trafficking in Asia, and asserting critical perspectives and methodologies, this book extends the range of sites for discussion and sectors in which human trafficking takes place. The book re-centres human trafficking as an area of legitimate academic inquiry in a region that is often considered as an epicentre for human trafficking: East and Southeast Asia. It thus offers an in-depth analysis and up-to-date knowledge on research methodologies and engagements, patterns and forms of human trafficking, constructively critiquing anti-trafficking campaigns and discourses, and offering examples of good practice within the region that help us move beyond the impasse that currently hampers human trafficking as a field of inquiry in the social sciences. Providing constructive avenues for human trafficking research to proceed methodologically, theoretically and ethically, this book is of interest to students and scholars of Politics, International Relations and Southeast Asian Studies.

Research Paper from the year 2011 in the subject History - World History - Modern History, grade: 1,0 (A), Rutgers The State University of New Jersey, course: Topics in Modern History: Modern Slavery, language: English, abstract: This paper, largely compiled from original research, demonstrates the ease of exploitation of women as victims of the sex industry and the sex trafficking industries via the internet. It details how easy it is for a person to exploit and dehumanize women, and how it more easily facilitates the spread of sex trafficking victims. The Internet is a seething maelstrom of ideas: media, images, stories, sites and everything else imaginable. The greatest works of art can be found online, the histories of nations are diligently recorded for study, and yes, you can even order pizza online and have it delivered to your home. Is it so surprising that the Internet also serves as a vehicle through which human beings are sexually exploited? Really, it oughtn't be. Considering that hardly a month goes by without at least ten news stories about internet pedophiles and sexual predators - but that's not the only sort of sexual exploitation on the web. The Internet is also being used to connect exploiters with the victims of human trafficking in a way that reduces their humanity to little more than a spreadsheet of sexual charged attributes. The Internet has allowed the sexual exploiters of women unfettered access to thousands of potential clients while shielding those consumers from the moral and ethical ramifications of their actions by portraying their exploitation of women as little more than an 'erotic massage'.

The enormous individual, familial, and societal burden of child sexual abuse has underscored the need to address the problem from a public health framework. Much work remains, however, at the first step of this framework — defining and understanding the scope of the problem, or establishing incidence and prevalence estimates. In this occasional paper, we provide an overview of the ways researchers have defined and estimated the scope of child sexual abuse, focusing on agency tabulations and large-scale surveys conducted over the last several decades. More precise estimates of the number of children affected by child sexual abuse would improve the ability of the public health, child welfare, pediatrics, and other communities to prevent and respond to the problem. We recommend using a comprehensive surveillance system to assess and track the scope of child sexual abuse. This system should be grounded by common definitional elements and draw from multiple indicators and sources to estimate the prevalence of a range of sexually abusive experiences.
