The second is connected to the Internet through an encrypted connection...and no-one knows who's on the other end. Special Agent Allison McNeil is asked by beleaguered FBI Director Clarence Mason to run an off-the-record investigation of the murder because of the murder's similarity to a case she worked a year earlier. Allison knows the most direct path to apprehending the killer is to find the videos, but the rumors that the victim's client list may have included Mason's political enemies has her worried about the director's motives. As she starts her investigation, she quickly discovers that she's not the only one pursuing the videos. In fact, the most aggressive person racing against her might be the murderer himself.

"This is a coursebook and reference guide for ichthyology courses that will also serve as a tool for ichthyologists, fisheries scientists, marine biologists, and vertebrate zoologists. It will cover the basic anatomy and diversity of all 62 orders of fishes, focusing on the distinguishing characteristics of approximately 180 of the most commonly encountered fish families. Each family will be diagnosed with easily observed characteristics and clear photos--many in color and from living specimens. This guide will be distinctive through the use of photographs of preserved specimens primarily from the Scripps Institution of Oceanography Marine Vertebrate Collection, supplemented by radiographs and additional illustrations of key characters. The goal is to give ichthyology students, fisheries scientists, marine biologists, vertebrate zoologists, and others with an interest or stake in the diversity of fishes a broad overview of the morphological diversity of fishes, arranged in a modern classification system. For students, it's a natural complement to primary ichthyology textbooks, which don't cover the breadth of morphological characteristics necessary to identify fish"--Provided by publisher.

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were

all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

A young Registered Nurse, not long out of her training years in a large, busy county hospital serving a major U.S. city, begins her day in the acute locked psychiatric ward of a smaller county hospital nearby. While she knows, in general, what to expect, the details that will emerge over the next eight hours are as yet not revealed. What follows, taken from the notes in her journal concerning that day, reflect the vast array of tragedies, great and small, the triumphs, the hopes, and the disappointments of a representative sample of the 20% of American citizens who will, during their lives, experience similar events that will cause them to spend time in such a setting. Events like suicide attempts, incest, murder, profound unhappiness, entrapment by mind-wrenching drugs, failed loves, and bizarre behavior, not confined to the patients alone, that set people apart from their fellows, along with hope and the earnest wish for a better life. This book, all of it true - though the names of the actors have been disguised - describes a burgeoning problem: what is, sometimes loosely and inaccurately, termed "mental illness" and modern attempts to deal with it. Many of them challenge our best efforts to define what is, and what is not, "normal." Their numbers are growing; the cost of their care takes a huge portion of health expenditures. Solutions are far from being at hand, yet those solutions are a measure of our humanity. Some of the people you will meet here are your friends and neighbors, your family and, just possibly, you yourself.
