Unrelenting Scarecrow Press The bestselling author of  $E=mc^2$  weaves tales of romance, divine inspiration, and fraud through an account of the invisible force that permeates our universe—electricity—and introduces us to the virtuoso secrets. For centuries, electricity was seen as little more than a curious property of certain substances that sparked when rubbed. Then, in the 1790s, Alessandro Volta began the scientific investigation that ignited an explosion of knowledge and invention. The force that once seemed inconsequential was revealed to be responsible for everything from the structure of the atom to the functioning of our brains. In harnessing its power, we have created a world of wonders—complete with roller coasters and radar, computer networks and psychopharmaceuticals. In *Electric Universe*, the great discoverers come to life in all their brilliance and idiosyncrasy, including the visionary Michael Faraday, who struggled against the prejudices of the British class system, and Samuel Morse, a painter who, before inventing the telegraph, ran for mayor of New York City on a platform of

---

persecuting Catholics. Here too is Alan Turing, whose dream of a marvelous thinking machine—what we know as the computer—was met with indifference, and who ended his life in despair after British authorities forced him to undergo experimental treatments to “cure” his homosexuality. From the frigid waters of the Atlantic to the streets of Hamburg during a World War II firestorm to the interior of the human body, *Electric Universe* is a mesmerizing journey of discovery.

HarperCollins  
"In my opinion, Harry Chamberlin is the founding father of equestrian sport in the United States. He has had a tremendous influence on the sport over the last sixty years, especially in riding methodology in show

jumping." - George H. Morris  
"Using direct, simple language, General Harry Chamberlin presents an account of riding and training horses for the show ring and for hunting which the rawest novice can understand and which the most experienced horseman will ponder. His discussion of the seat, hands, jumping, application of the aids, and fundamental riding precepts, should be read and reread many times. The Chamberlin seat, an eclectic evolution of broad experience, is set forth with unanswerable common sense and logic." - John Cudahy  
"It takes a certain amount of genius, not just to see what others have seen, but to say things others have never said. Writing in clear, understandable prose, Chamberlin lays out his system, a system still in use nearly a century later. Not only could Chamberlin, a genius in the saddle, make it work, but his students and their students made it work. He was the leading light of the military horse world for three decades, and his influence continues to the present day. With his writings and teachings, Chamberlin satisfies one of the most sacred duties of a horseman: He produces a

---

system of riding and training that truly preserves "the tranquility of the horse."

With an astounding eighteen medals in eight international championships and team gold medals at the Olympic Games in 1976 and 1984, Jack Le Goff created the standard by which modern-day equestrian teams are measured. But Le Goff's techniques could be unforgiving—tough, brutal, and abrasive—earning him critics as well as converts. In this, his autobiography, Le Goff tells the whole story, from impoverished beginnings in Morocco, to the tragic death of his father, to his successes as a competitive equestrian.

Readers will enjoy a behind-the-scenes look at the inner workings of high-level international equestrian sport, as well as an entire section devoted to Le Goff's much admired and extremely successful training philosophy. *Geoff Teall on Riding Hunters, Jumpers and Equitation* Lyons Press

In 2008, 26-year-old Tik Maynard faced a crossroads not unlike that of other young adults. A university graduate and modern pentathlete, he suffered both a career-ending injury and a painful breakup, leaving him suddenly adrift. The son of prominent Canadian equestrians, Maynard decided to spend the next year as a "working student." In the horse industry, working students aspire to become professional riders or trainers, and willingly trade labor for hands-on education. Here Maynard chronicles his experiences—good and bad—and we follow along as one year becomes three, what began as a casual adventure gradually

transforms, and a life's purpose comes sharply into focus. Over time, Maynard evolved under the critical eyes of Olympians, medal winners, and world-renowned figures in the horse world, including Anne Kursinski, Johann Hinnemann, Ingrid Klimke, David and Karen O'Connor, Bruce Logan, and Ian Millar. He was ignored, degraded, encouraged, and praised. He was hired and fired, told he had the "wrong body type to ride" and that he had found his "destiny." He got married and lost loved ones. Through it all he studied the horse, and human nature, and how the two can find balance. And in that journey, he may have found himself.

Carouser, competitor, taskmaster, dreamer, teacher, and visionary, George Morris has been ever-present on the rarified stage of the international riding elite for most of the seventy years he's been in the saddle. He has represented our country as an athlete and a coach and, at one time or another, instructed many of our nation's best horsemen and women. His carefully chosen, perfectly enunciated words are notoriously powerful. They can raise you up or cut you to the quick. His approval can be a rainmaker; his derision can end a career. But as much as people know and respect (or perhaps, fear) the public face of George Morris, he has lived, in other ways, a remarkably private life, keeping his own personal

struggles - with insecurity, ambition, and love - behind closed doors. It is only now that he has chosen, in his own words, to share the totality of his life - the very public and the incredibly private - with the world. The result for many is a surprisingly frank, honest, personal retrospective from a man presumed to be strict, guarded, and even scary. But while deviating from his reputation as a stickler for formality in some respects, George Morris remains true to his loyalty to his sport and his country, providing an unparalleled chronology of the rise of American equestrianism and its major players - both human and equine. Within these pages readers will find a vivid and often touching portrayal of a man's journey from nervous youth to indelible leader, enmeshed in a fascinating description of high society, international travel, gay life, and elite sport through the past six decades. This engrossing autobiography, the real story of the godlike George Morris, beautifully demonstrates his ultimate humanity.

**In the Middle Are the Horsemen** Doubleday Books

Filled with equestrian insights, Harry Chamberlin's biography is the story of a preeminent equestrian theorist and teacher, an

adoring father and husband, a brilliant military officer and a genius in the saddle. His career spanned 34 years of accomplishment. He trained the 1st Cavalry Division to become "the best trained division in the Army" and one of its most decorated combat divisions during World War II. He earns the highest respect of generals and sergeants. At the Olympics of 1932, the US Cavalry's greatest horseman, Major Harry Chamberlin faces a problem: His prized jumper goes lame. Rather than scratch, Chamberlin mounts a gray mare on which he has never competed before, rides into the stadium as 105,000 spectators look on and surmounts the most difficult jumping course in Olympic history. His performance astounds to this day. A horseman of uncanny abilities, Chamberlin devised a unique combination of techniques to ride and train. His system enables novice riders to begin on a solid foundation and seasoned Olympians to further hone their skills. He combined French, Italian, German, and American methods to fashion a revolutionary new riding "seat" which remains standard for many equestrians today. "Beyond

his horsemanship, in an era that produced the greatest crop of outstanding soldiers in America's history, Harry Chamberlin was a soldier's soldier? He represents the model military professional?" - Historian Lt. Col. Louis DiMarco, Ph.D. Years earlier, the Commandant of the famous Italian Cavalry School at Tor di Quinto, says of Chamberlin: "the pupil has surpassed his master." Years later, George H. Morris calls Chamberlin the "founding father of equestrian sport in the United States." James Wofford ranks him "second only to Caprilli in international influence" and writes: "Chamberlin is to horsemanship as Mozart is to music."
