An authoritative and entertaining
exploration of Australia's
distinctive birds and their
unheralded role in global
evolution Renowned for its
gallery of unusual mammals,
Australia is also a land of
extraordinary birds. But unlike
the mammals, the birds of
Australia flew beyond the
continent's boundaries and
around the globe many millions
of years ago. This eye-opening
book tells the dynamic but little-

known story of how Australia provided the world with songbirds and parrots, among other bird groups, why Australian birds wield surprising ecological power, how Australia became a major evolutionary center, and why scientific biases have hindered recognition of these discoveries. From violent, swooping magpies to tool-making cockatoos, Australia's birds are strikingly different from birds of other lands—often more intelligent and aggressive, often larger and longer-lived. Tim Low, a renowned biologist with a rare storytelling gift, here presents the amazing evolutionary history of Australia's birds. The story of the birds, it turns out, is inseparable from the story of the continent itself and also the people who inhabit it.

Love's Cure, or The Martial Maid
is an early seventeenth-century
stage play, a comedy in the canon
of John Fletcher and his
collaborators. First published in
the Beaumont and Fletcher folio of
1647, it is the subject of broad
dispute and uncertainty among
scholars. In the words of Gerald
Eades Bentley, "nearly everything
about the play is in a state of
confusion...." The manifold
problems about Love's Cure
inevitably complicate the scholarly
and critical response to the play. It
is hard to say what the play reveals
about Fletcher's dramaturgic
artistry when his participation in
the project is so clouded by
uncertainty - one critic even
referring to Fletcher's
"collaboration with the dead." The
play's strong theme of gender and
sexuality, though, has attracted

Ben Brooksby is a fifth-generation farmer from St Helens Plains in western Victoria. When he was younger, he struggled with anxiety and other mental health issues, as do so many others in rural communities. A simple social media post helped him to turn things around. After he shared a photo on Instagram showing

himself naked in a truck full of lentils, he received a huge response, with other farmers wanting to share their own photos - and their stories. As the Naked Farmer movement grew, Ben met people from all around the country who wanted to get naked for mental health. As they got their kits off, they also opened up about their struggles. This is a heartwarming, moving and candid collection of stories of the challenges our farmers are facing, and the way these communities are banding together in response. Few scholars have been as influential in finance, both as an academic field and an industry, as Eugene Fama. Since writing his groundbreaking 1970 essay on efficient capital markets, Fama has written over 100 papers and books that have been cited hundreds of

thousands of times. Yet there is no one collection where one can easily find his best work in all fields. "The Fama Portfolio" will be an outstanding and unprecedented resource in a field that still concentrates mainly on questions stemming from Fama's work: Is the finance industry too large or too small? Why do people continue to pay active managers so much? What accounts for the monstrous amount of trading? Do high-speed traders help or hurt? The ideas, facts, and empirical methods in Fama's work continue to guide these investigations. "The Fama Portfolio" will be a historic and long-lasting collection of some of the finest work ever produced in finance."
