The Song of the Lark National Academies Press

In October 1942 Maj. Gen. Mark W. Clark, representing the U.S. Army, and Brig. Gen. Charles Mast, spokesman for General Henri Giraud, met secretly in Cherchel, seventy-five miles west of Algiers. The subject of their conversations was a momentous one—the imminent re-entry of French North Africa into the war. General Clark, acting on instructions from President Roosevelt, gave positive assurances to General Mast that the United States would furnish the equipment necessary to outfit the North African forces. Clark's commitment was timely, for Anglo-American forces were about to land in northwest Africa. More important, it heralded an event of great significance: the

forthcoming assumption, by the United States, of direct responsibility for reequipping the French armed forces. The British had been discharging this responsibility by maintaining the small band of Frenchmen stubbornly fighting on their side and under their control since mid-1940. Before World War II had ended, the Americans had fully equipped and trained eight French divisions in North Africa, partially outfitted and trained three more in France, furnished equipment for nineteen air squadrons, and carried out an extensive rehabilitation program for the French Navy. They had supplied some 1,400 aircraft, 160,000 rifles and carbines, 30,000 machine guns, 3,000 artillery guns, 5,000 tanks and These instructions were relayed in Msg R-2080, Gen George C.

Marshall to Lt Gen Dwight D. Eisenhower, 17 Oct 42, CM-OUT 5682. (See Bibliographical Note.) "Clark . . . should state . . . the U.S. will furnish equipment for French Forces which will operate against the Axis." self-propelled weapons, and 51,000,000 rounds of ammunition. An occurrence of historic import was thus re-enacted in reverse. Twice France had similarly undertaken to assist an unprepared America at war. In 1781, in addition to sending an expeditionary corps to help the young colonies in their fight for independence, France supplied weapons and materiel to the infant Continental Army. Much later, in World War I. France, herself at war with Germany, again provided materiel to the American Expeditionary Forces (A.E.F.) sent to the European

continent. In that second episode, the nature and extent of the help rendered were vastly different from what they were to be in World War II. Yet the parallel is striking enough to warrant, for the sake of historical comparison, a brief account of the aid extended by the French to the American forces in 1917-18."

A Study in Scarlet is an 1887 detective novel by Scottish author Arthur Conan Doyle. Written in 1886, the story marks the first appearance of Sherlock Holmes and Dr. Watson, who would become the most famous detective duo in popular fiction. The book's title derives from a speech given by Holmes, a consulting detective, to his friend and chronicler Watson on the nature of his work, in which he describes the story's murder investigation as his "study in scarlet": "There's the scarlet thread of murder running through the colourless skein of

life, and our duty is to unravel it, and isolate it, and expose every inch of it."

n this extremely comprehensive overview of airlift and air mobility, Colonel Miller shows how the worldwide orientation of American foreign policy, the numerous threats to free-world interests, and the speed and complexity of modern warfare have combined with political and resource constraints to

produce today's airlift doctrine and force structure. Airlift is the movement of goods and people to where they are needed, when they are needed there. Since the 1920s there has been an evolving awareness and articulation of how to best organize, train, and equip airlift forces for that mission. The worldwide orientation of American foreign policy, the numerous threats to free world interests, and the speed and complexity of modern warfare have combined with political and resource constraints to produce today's airlift doctrine and force structure. Colonel Miller's study traces these many interrelationships

to discover what critical airlift decisions were made, why they were made, and what they may mean in the future. Airlift is the backbone of deterrence. A properly structured and equipped airlift force is critical to the successful execution of the national military strategy. How we think about airlift and how we translate those thoughts into a meaningful expression of how to develop, deploy, and employ airlift forces is vital to the national defense. Colonel Miller's study is a definitive step in that important process.

in 1928, is a timeless portrayal of lesbian love. The thinly disguised story of Hall's own life, it was banned outright upon publication and almost ruined her literary career as the subject was that of an obscenity trial and forbidden at the time in England. The novel tells the story of Stephen, an ideal child of aristocratic parents—a fencer, a horse rider and a keen scholar. Stephen grows to be a war hero, a bestselling writer and a loyal, protective lover. But Stephen is a woman, and is attracted to women. As her ambitions drive her, and society incarcerates her, Stephen is forced into desperate actions. Although Gordon's attitude toward her own sexuality is anguished, the novel presents

lesbianism as natural and makes a plea for greater tolerance. It became an international bestseller, and for decades was the single most famous lesbian novel.

Music in Conflict studies the complex relationship of musical culture to political life in Palestine-Israel, where conflict has both shaped and claimed the lives of Palestinians and Jews. In the context of the geography of violence that characterizes the conflict, borders and boundaries are material and social manifestations of the ways in which the production of knowledge is conditioned by political and structural violence. Ethical and

aesthetic positions that shape artistic production in this context are informed by profound imbalances of power and contingent exposure to violence.

Viewing expressive culture as a potent site for understanding these dynamics, the book examines the politics of sound to show how music-making reflects and forms identities, and in the process, shapes communities. The ethnography is based on fieldwork conducted in Israel and the West Bank in 2011 – 2012 and other excursions since then.

Author has "followed the conflict" by "following the music," from concert halls to demonstrations, mixed-city community centers to Palestinian refugee camp children ' s clubs, alternative urban scenes and even a

checkpoint. In all the different contexts presented, the monograph is thematically and theoretically underpinned by the ways in which music is used to culturally assert or reterritorialize both spatial and social boundaries in a situation of conflict.

By his early thirties, Paul Allen was a world-famous billionaire-and that

was just the beginning. In 2007 and 2008, Time named Paul Allen, the cofounder of Microsoft, one of the hundred most influential people in the world. Since he made his fortune, his impact has been felt in science, technology, business, medicine, sports, music, and philanthropy. His passion, curiosity, and intellectual rigor-combined with the resources to launch and support new initiatives-have literally changed the world. In 2009 Allen discovered that he had lymphoma, lending urgency to his desire to share his story for the first time. In this classic memoir, Allen explains how he has solved problems, what

he's learned from his many endeavors—both the triumphs and the failures—and his compelling vision for the future. He reflects candidly on an extraordinary life. The book also features previously untold stories about everything from the true origins of Microsoft to Allen's role in the dawn of private space travel (with SpaceShipOne) and in discoveries at the frontiers of brain science. With honesty, humor, and insight, Allen tells the story of a life of ideas made real.

A Pocket Guide to Netherlands East Indies was originally a 5.25"x4.24" pocket-size booklet released in 1943 for American GIs in World War II on their way to Indo-European countries, including Sumatra, Java, and Borneo, which were near territories occupied and controlled by the Japanese. The pamphlet outlines the role of the soldier, as well as descriptions of the different countries and peoples, their habits and cultures, and the native vegetation and wildlife. The booklet includes a map of the 3,000 countries making up the East Indies, guides to currency, time, measurements, and

language, and a list of dos and don'ts when interacting with the general population. The War and Navy Departments, Washington D.C., publish pamphlets, reports, manuals, and instructions ranging on topics from countries and regions of the world, machine and weapon operation, roles of persons and positions, vehicle operation and safety, and other topics pertinent in wartime and for the military.
