Popular Mechanics CHIKYU-MARU Non-Chemical Weed Control is the first book to present an overview of plant crop protection against non-food plants using non-chemical means. Plants growing wild—particularly unwanted plants found in cultivated ground to the exclusion of the desired crop—have been treated with herbicides and chemical treatments in the past. As concern over

environmental, food and consumer safety increases, research has turned to alternatives, including the use of cover crops, thermal treatments and biotechnology to reduce and eliminate unwanted plants. This book provides insight into existing and emerging alternative crop protection methods and includes lessons learned from past methodologies. As crop production resources decline while consumer concerns over safety increase, the effective control of weeds is imperative

to insure the maximum possible levels of soil, sunlight and nutrients reach the crop plants. Allows reader to identify the most appropriate solution based on their individual use or case Provides researchers, students and growers with current concepts regarding the use of modern, environment-friendly weed control techniques Presents methods of weed management—an important part of integrated weed management in the future Exploits the knowledge gained

Once you're familiar with Will Malloff's method of chainsaw lumbermaking, you'll be simply and economically turning trees into lumber on your own. Learn how to select the tree you want, fell it safely, and saw it into a fine pile of building or cabinet lumber. With detailed instructions and over 400 photographs, Will Malloff tells you everything you need to know to turn a chainsaw into a lumbermill, including how to: Modify the chainsaw and make

numerous accessories for milling. Use the equipment in the woods. Grind a smooth-cutting ripping chain. Build your own mill from a 2 x 4 and scraps of plywood. Cut burls, shape ovals and mill natural knees for boatbuilding. Malloff's method is the fruit of over 30 years' experience of felling trees and making lumber. He's logged everything from giant redwoods to desert mesquite and fulfilled his youthful ambition to fell timber in every major forest of North America. Drawing on this experience, he has invented several chainsaw mills, and perfected the easy, efficient method of chainsaw lumbermaking that he describes in this book. If you've ever had trouble finding the

lumber you need, or wanted to build something with your own trees, "Chainsaw Lumbermaking" is the book you've been waiting for. Will Malloff has built a variety of mills and is the designer of what many consider the most effective chainsaw lumbermaking system available. Malloff has spent nearly half a century researching and developing tools and wood technology that minimize ecological impact. In an endeavor to build his own blacksmith shop on a Canadian Pacific island, he invented a state-of-the-art ripping chain, which made chainsaw lumbermaking more feasible and economical than ever before.
