**GLIMPSES OF OTHER REALITIES--VOLUME 1: FACTS & EYEWITNESSES** details investigations of the worldwide crop circle, animal mutilation, & human abduction mysteries with photographs, drawings, maps & documents. In the puzzling crop formations described in Chapter 1, one biophysicist has discovered biochemical & biophysical changes in affected plants which he says cannot be hoaxed. Since the 1960s, other circles have been found in association with the worldwide animal mutilation mystery which is the subject of Chapter 2. Dry, ceramic-hard circles in which grasses are dead have been found in pastures underneath or near animals from which tissue has been excised surgically & bloodlessly. In at least three cases, people affected by the "UFO abduction syndrome" have received

information about animal mutilations which is included in Chapter 3, along with conscious eyewitness reports of other beings. The repeating patterns of non-human entities that people have drawn or painted are included in Chapter 4 as well as photographs of ancient Sumerian "gods" that resemble modern-day drawings of alleged extraterrestrials from military & civilian cases. The international bee crisis is threatening our global food supply, but this user-friendly field guide shows what you can do to help protect our pollinators. The Xerces Society for Invertebrate Conservation offers browsable profiles of 100 common flowers, herbs, shrubs, and trees that support bees, butterflies, moths, and hummingbirds. The recommendations are simple: pick the right plants for pollinators, protect them from pesticides, and provide abundant blooms throughout the growing season by mixing perennials with herbs and annuals! 100 Plants to Feed the Bees will empower homeowners, landscapers, apartment dwellers — anyone with a scrap of yard or a window box — to protect our pollinators.

Stark is a secret consortium with more money than God, and the social conscience of a dog on a croquet lawn. What's more, it knows the Earth is dying. Deep in Western Australia where the Aboriginals used to milk the trees, a planet-sized plot is taking shape. Some green freaks pick up the scent: a pommie poseur; a brain-fried Vietnam vet; Aboriginals who have lost their land...not much against a conspiracy that controls society. But EcoAction isn't in society: it just lives in the same place, along with the cockroaches. If you're facing the richest and most disgusting scheme in history, you have to do more than stick up two fingers and say 'peace'.

In the past decades, lightweight building construction methods and the use of

manmade materials in construction and furnishings have become more and more common. The time until structural failure can be expected in a fire has been reduced, and firefighters have seen hotter fires that generate high levels of deadly gasses. But the ventilation methods used by modern firefighters have not kept pace. Positive pressure was first used in the fire service to ventilate a structure after the fire was knocked down. Authors Kriss Garcia and Reinhard Kauffmann have taken positive pressure a step further to achieve effective ventilation in coordination with aggressive fire attack, called positive pressure attack (PPA). Properly used PPA allows firefighters great control over the interior environment of a fire building, and starts at the earliest stages of the operation when ventilation can provide the greatest benefit for victims, firefighters, and the structure. With a small investment in equipment and a commitment to training, any fire department can implement PPA at the company level. Subjects covered in this book include: • Basics of positive pressure and how to maximize its effectiveness for fireground ventilation. • PPA: how effective ventilation can be coordinated to support an aggressive fire attack. • Safety considerations and limitations of PPA and positive pressure. • Other ways positive pressure blowers can be used to help victims and firefighters in a variety of situations. • Implementing PPA on a department, and how to train each engine company to become its own firefighting force that can accomplish both ventilation and fire attack.
