You can use the Storm Sewers extension to open and edit pipe networks created with AutoCAD Civil 3D. To open pipe

networks in the Storm Sewers Extension, they must first be exported to an .stm file. The .stm file can then be opened by the Storm Sewers Extension and edited. For example, you can create pipe networks in AutoCAD Civil 3D, and then import those pipe networks into Storm Sewers to ...

Civil 3D Training - Hydraflow

Storm Sewers Tutorial

Hydraflow Storm Sewers

Extension is a full-featured application you can use for hydrologic and hydraulic analysis of both simple and complex storm sewer networks.

Use this tool to determine the hydraulic grade line in an existing system or to plan and design a new system.

Everything You Need to Design Better Storm Sewers. When hydraulic grade line calculations have to be done right, Stormwater Studio is your go-to storm sewer design and analysis software. It handles all flow regimes including partial depth (free surface), full, surcharged, supercritical flow with hydraulic jumps.

Modeling Hydraulic and Energy Gradients in Storm Sewers:
October 6, 2009 Page

2 Abstract There are many engineering design programs capable of calculating the Hydraulic Gradient Line (HGL) and the Energy Gradient Line (EGL) for storm sewer pipe systems. Two of these software packages, UD-Sewer and StormCAD, perform the same functions. *About Editing Pipe Networks Using the Storm Sewers ...* Hydraflow Advantage. Hydraflow provides fluid transfer solutions that reduce customer's installation time, waste, weight and life-cycle costs. In addition we couple our highly innovative and differentiated products with a

culture of service and quality, giving our customer the competitive advantage to succeed in their business.

Just set up my first model in Hydraflow. I've created the catchments and pipe network in Civil3D and exported that to Storm Sewers. I've defined my IDF curves based upon the NOAA atlas. Problem is, I'm getting a flow rate of around 5.9 cfs in the most downstream pipe, when the actual runoff should ...

This lesson is from the new "Hydraflow Storm Sewers" training series that we just finished. It covers setting up and configuring the pipe design codes in the Civil 3D hydraflow software.

*Hydraflow Storm
Sewers Manual*

In brief, Hydraflow Storm Sewers Extension can design and model a network of up to 250 storm sewer lines at once. The network is basically made up of "Lines". A line is a length of pipe with a junction at the upstream end.

Junctions can be manholes, inlets, j-boxes or other structures where losses or gains occur.
