Indoor Air Quality - Workplace Hygiene
This article will focus on key hygienic evaluation points of an air-handling unit (AHU) and the associated ductwork supplying air to rooms where exposed food products are processed. These key points include risk assessment and verification, hygienic design of AHUs and the associated ductwork, and several important food safety and quality parameters to consider for the air supplied to these rooms.

Therefore, our rating means we guarantee no indoor air pollution, ensuring maximum quality of the air inside your gym. All this adds up to an extremely hygienic flooring solution . Other floors contain toxic materials or release harmful particles into the air, affecting your gym ’ s air quality and putting the health of your members and staff in danger.
