You are about to enter the deep woods where Sammy the skunk becomes a hero to

the animals that live there. Although Sammy does not live in the deep woods, he enters it quite by accident and his adventures begin immediately. This book is the first in a series of stories about Sammy the skunk. In this edition you will meet Mr. Fox. You will find what Sammy did to him and how Sammy becomes his best friend. You will also learn how Sammy helped a beaver who lost his teeth. Life lessons are written for each of the three stories in this book. They include a question for children to think about, a scripture verse, a truth about God, and a short message about the love God has for His children.

The economic and political systems, legal code and religious beliefs of the people of the New Guinea village of Busama were analysed by H. Ian Hogbin in his earlier work, Transformation Scene (1951). In this new study founded on field work carried out at intervals over a seven year period, he is concerned primarily with the individual in his relations with the kinship structure. He takes a typical Busama through a full span of life, from birth through infancy, childhood, adolescence, and marriage to maturity and death; and he shows how each stage in the individual's life involves a change in his kinship relationships and responsibilities. This approach gives the professional anthropologist a set of carefully presented data analysed in line with the contemporary emphasis on seeing the relations between kin in the context of the local community, and it also offers the general reader an enjoyable and authentic account of the intimacies of Melanesian life.

Managing Human Resources W G Nichols Pub Wouldn't it be great if there were a physics book that showed you how things work instead of telling you how? Finally, with Head First Physics, there is. This comprehensive book takes the stress out of learning mechanics and practical physics by providing a fun and engaging experience, especially for students who "just don't get it." Head First Physics offers a format that's rich in visuals and full of activities, including pictures, illustrations, puzzles, stories, and quizzes -- a mixed-media style proven to stimulate learning and retention. One look will convince you: This isn't mere theory, this is physics brought to life through real-world scenarios, simple experiments, and hypothetical projects. Head First Physics is

perfect for anyone who's intrigued by how things work in the natural world. You'll quickly discover that physics isn't a dry subject. It's all about the world we live in, encompassing everything from falling objects and speeding cars, to conservation of energy and gravity and weightlessness, and orbital behavior. This book: Helps you think like a physicist so you can understand why things really work the way they do Gives you relevant examples so you can fully grasp the principles before moving on to more complex concepts Designed to be used as a supplement study guide for the College Board's Advanced Placement Physics B Exam Introduces principles for the purpose of solving real-world problems, not memorization Teaches you how to measure, observe, calculate -- and yes -- how to do the math Covers scientific notation, SI units, vectors, motion, momentum conservation, Newton's Laws, energy conservation, weight and mass, gravitation and orbits, circular motion and simple harmonic motion, and much more If "Myth Busters" and other TV programs make you curious about our physical world -- or if you're a student forced to take a physics course -- now you can pursue the subject without the dread of boredom or the fear that it will be over your head. Head First Physics comes to rescue with an innovative, engaging, and inspirational way to learn physics! Religious icons have been a contested terrain across the world. Their implications and understanding travel further than the artistic or the aesthetic and inform contemporary preoccupations. This book traces the lives of religious sculptures beyond the moment of their creation. It lays bare their purpose and evolution by contextualising them in their original architectural or ritual setting while also following their displacement. The work examines how these images may have moved during different phases of temple renovation and acquired new identities by being relocated either within sacred precincts or in private collections and museums, art markets or even desecrated and lost. The book highlights

contentious issues in Indian archaeology such as renegotiating identities of religious images, reuse and sharing of sacred space by adherents of different faiths, rebuilding of temples and consequent reinvention of these sites. The author also engages with postcolonial debates surrounding history writing and knowledge creation in British India and how colonial archaeology, archival practices, official surveys and institutionalisation of museums has influenced the current understanding of religion, sacred space and religious icons. In doing so it bridges the historiographical divide between the ancient and the modern as well as socio-religious practices and their institutional memory and preservation. Drawn from a wide-ranging and interdisciplinary study of religious sculptures, classical texts, colonial archival records, British travelogues, official correspondences and fieldwork, the book will interest scholars and researchers of history, archaeology, religion, art history, museums studies, South Asian studies and Buddhist studies.
