Tatum Everley is a freshman at Western Michigan University. Due to an emotionally and psychologically abusive past relationship, Tate struggles from Complex-Post Traumatic Stress Disorder. She has been working on controlling her symptoms and flashbacks, but when she meets Axel Burne at a fraternity party, who is notorious for sleeping around and getting into fights, she tries her best to dodge the bullet. Axel starts to become intrigued by Tate, but she's better off choosing Lucas- the sweet guy who has been trying to take her out since orientation. But even though Lucas is the better option, Axel keeps reappearing. Tate continues to try to stay away from him, but it starts becoming harder to, and as she gets closer to him, things start to get way out of hand. If Tate wants her happy ending and her sanity intact, then she has to push through the hardships and maintain control over her disorder.

Widely regarded as one of the greatest American writers of the modern era, F. Scott Fitzgerald is considered a member of the "Lost Generation" of the 1920's. His masterpiece 'The Great Gatsby', a 1925 Jazz Age tale about the impossibility of recapturing the past, was initially a failure. Today, the story of Gatsby's doomed love for the unattainable Daisy is judged by many to be the greatest novel of the 20th century. Fitzgerald was also a writer of numerous short stories, plays and essays, revealing the incredible breadth of his literary talents. This eBook presents Fitzgerald's collected works, with numerous illustrations, rare texts, informative introductions and the usual Delphi bonus material. (Version 4) * Beautifully illustrated with images relating to Fitzgerald's life and works * Concise introductions to the major works * Three novels, including 'The Great Gatsby', with individual contents tables * Features the rare unfinished novel 'Philippe, Count of Darkness', appearing here for the first time in publishing history * Images of how the books were first published, giving your eReader a taste of the original texts * Excellent formatting of the texts * Many rare short stories available in no other collection * Special chronological and alphabetical contents tables for the short stories * Easily locate the stories you want to read * Includes Fitzgerald's rare play, poetry and essays - available in no other collection * Ordering of texts into chronological order and genres * UPDATED with revised texts and rare stories Please note: due to US copyright restrictions, post-1925 works cannot appear in this edition. When new texts become available, they will be added to the eBook as a free update. Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival. Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives. Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.

Society Random House Books for Young Readers

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985.

Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.
