Nineteenth Century Collections Online: European Literature, 1790-1840: The Corvey Collection includes the full-text of more than 9,500 English, French and German titles. The collection is sourced from the remarkable library of Victor Amadeus, whose Castle Corvey collection was one of the most spectacular discoveries of the late 1970s. The Corvey Collection comprises one of the most important collections of Romantic era writing in existence anywhere -- including fiction, short prose, dramatic works, poetry, and more -- with a focus on especially difficult-to-find works by lesser-known, historically neglected writers. The Corvey library was built during the last half of the 19th century by Victor and his wife Elise, both bibliophiles with varied interests. The collection thus contains everything from novels and short stories to belles lettres and more populist works, and includes many exceedingly rare works not available in any other collection from the period. These invaluable, sometimes previously unknown works are of particular interest to scholars and researchers. European Literature, 1790-1840: The Corvey Collection includes: * Novels and Gothic Novels * Short Stories * Belles-Lettres * Short Prose Forms * Dramatic Works * Poetry * Anthologies * And more Selected with the guidance of an international team of expert advisors, these primary sources are invaluable for a wide range of academic disciplines and areas of

study, providing never before possible research opportunities for one of the most studied historical periods. HyZor Technology Manual Random House Books for Young Readers

The book is a revealing anti-Vietnam War narrative about the day to day interactions of a group of young combatants coping with the realities of war during redeployment. The lives of these mostly draftees are candidly detailed as the story negotiates the one year tour faced by all who served there. It gives an insight into the Spartan life of the foot soldier and the predicament of the many reluctant warriors who, by 1970, were faced with fighting a war that seemingly no longer needed to be fought. The story deals with a lot of the intimate issues that were both common to all of the troops and relevant to many of the families at home. It is an informative study for the uninitiated and a remembrance for all who were affected that would easily qualify as more than just a journal dealing only with the conflict. There is also a parallel story portraying the tragedy of a mother struggling with the loss of her son to the war. Her ensuing long term grieving process and the effect she had on the survivors of the battle is a centerpiece of the book. The abundance of drugs and the immaturity of the troops facing the disparity of fighting for an unpopular foreign policy created an unusual war effort. With no victory to achieve, there were only lives to be lost as the war dragged on. In the face of the odds stacked against them, they reinvented their purpose for being there and fought for each other creating a bond that testifies to the human spirit and its ability to adapt.

Foundations of Neuro-Fuzzy Systems reflects the current trend in intelligent systems research towards the integration of neural networks and fuzzy technology. The authors demonstrate how a combination of both techniques enhances the performance of control, decision-making and data analysis systems. Smarter and more applicable structures result from marrying the learning capability of the neural network with the transparency and interpretability of the rule-based fuzzy system. Foundations of Neuro-Fuzzy Systems highlights the advantages of integration making it a valuable resource for graduate students and researchers in control engineering, computer science and applied mathematics. The authors' informed analysis of practical neuro-fuzzy applications will be an asset to industrial practitioners using fuzzy technology and neural networks for control systems, data analysis and optimization tasks.

Passage to Faith Createspace Independent Publishing Platform

This book explores the pivotal role of think tanks in the democratization and economic reform movements by evaluating their overall effect on the transformation process in developing and transitional countries around the world. James G. McGann assesses twenty-three think tanks, located in nine countries and four regions of the world: Chile, Peru, Poland, Slovakia, South Africa, Botswana, the Philippines, Thailand, and Vietnam, that have most impacted political and economic transitions in their respective countries. The author

examines the role they played in the process of democratization and market reform during the late 80s and 90s and identifies the importance of think tanks in these processes by evaluating their overall effect on the policymaking process. He argues in the early stages of a transition from an authoritarian regime to an open and democratic society the activities of think tanks are especially critical, and they have provided a civil society safety net to support these fragile democracies. This book will be of interest to students and scholars of political science, democratization, development, economic development and civil society.
