A legend in the car industry reveals the philosophy that's starting to turn General Motors around. In 2001, General Motors hired Bob Lutz out of retirement with a mandate to save the company by making great cars again. He launched a war against penny pinching, office politics, turf wars, and risk avoidance. After declaring bankruptcy during the recession of 2008, GM is back on track thanks to its embrace of Lutz's philosophy. When Lutz got into the auto business in the early sixties, CEOs knew that if you captured the public's imagination with great cars, the money would follow. The car guys held sway, and GM dominated with bold, creative leadership and iconic brands like Cadillac, Buick, Pontiac, Oldsmobile, GMC, and Chevrolet. But then GM's leadership began to put their faith in analysis, determined to eliminate the "waste" and "personality worship" of the bygone creative leaders. Management got too smart for its own good. With the bean counters firmly in charge, carmakers (and much of American industry) lost their single-minded focus on product excellence. Decline followed. Lutz's commonsense lessons (with a generous helping of fascinating anecdotes) will inspire readers at any company facing the bean counter analysis-paralysis menace.

A brilliant and chilling dystopia for a new generation in the tradition of Brave New World. "Explain to us why you wish to enter The Academy." Anaximander, a young Academy candidate, is put through a gruelling exam. Her special subject: the life of Adam Forde, her long-dead hero. It's late in the 21st century and the island Republic has emerged from a ruined, plague-ridden world, its citizens safe, but not free, and living in complete isolation from outside contact. Approaching planes are gunned down, refugees shot on sight. Until a man named Adam Forde rescued a girl from the sea. "Anaximander, we have asked you to consider why it is you would like to join the Academy. Is your answer ready?" To answer that question, Anaximander must struggle with everything she has ever known about herself and her beloved Republic's history, the nature of being human, of being conscious, and even what it means to have a soul. And when everything has been laid bare, she must confront the Republic's last great secret, her own surprising link to Adam Forde, and the horrifying truth about her world. Get stuck in ... Why do some people become demons when they get behind a wheel? Why does the other lane always move faster? Why do New Yorkers jaywalk (and nobody does in Copenhagen)? And why should you never drive with any beer-drinking, divorced doctors named Fred? Driving is about far more than getting from A to B. As Tom Vanderbilt's brilliant, curiosity-filled book shows, it's actually the key to deciphering human nature and ... well, pretty much everything. From the etiquette of horn-honking to bumper stickers you should avoid, from gridlock in ancient Rome to why getting rid of road signs actually reduces accidents, Traffic will change the way you see yourself, and other people (and not just through your windscreen).

Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.

"Eighteen-year-old Blanca has lived a sheltered life. Her entire childhood has been spent at Tabula Rasa School where she's been protected from the Internet.

Blanca has never been online and doesn't even know how to text. Her lack of a virtual footprint has made her extremely valuable and upon graduation Blanca, and those like her, are sold to the highest bidders. Blanca is purchased by Cal McNeal, who uses her to achieve personal gain. But the McNeals are soon horrified by just how obedient and non-defiant Blanca is. All those mind-numbing years locked away from society have made her mind almost impenetrable. By the time Blanca is ready to think for herself, she is trapped. Her only chance of escape is to go online."--Page [4] of cover.

mocking hostility. Ken Ham, one of Christendom's most astute observers of evangelism, is convinced that compromise with evolutionary world views has virtually crippled preaching and teaching efforts, especially in Western societies. In this truly bold book, Ham presents an ambitious plan to fulfill the Great Commission. A compelling writer and speaker, Ham deftly exposes the great flaws of Darwinism, and shows how compromise with this philosophy of death is killing the Church. By the jungle of tangled views of reality, and helps committed Christians see the path to effective evangelism.

This handbook focuses on two sides of the lean production debate that rarely interact. On the one hand, management and industrial engineering scholars have presented a positive view of lean production as the epitome of efficiency and quality. On the other hand, sociology, industrial relations, and labor relations scholars focus on work speedups, management by stress, trade union positions, and self-exploitation in lean teams. The editors of this volume understand the merits of both views and present them accordingly, bridging the gaps among five disciplines and presenting the best of each perspective. Chapters by internationally acclaimed authors examine the positive, negative and neutral possible effects of lean, providing a global view of lean production while adjusting lean to the cultural and political contexts of different nation-states. As the first multi-lens view of lean production from academic and consultant perspectives, this volume charts a way forward in the world of work and management in our global economy.
