explains how brand relevance drives market dynamics, which generates opportunities for your brand and threats for the competition. Aaker reveals how these companies have made other brands in their categories irrelevant. Key points: When managing a new category of product, treat it as if it were a brand; By failing to produce what customers want or losing momentum and visibility, your brand becomes irrelevant; and create barriers to competitors by supporting innovation at every level of the organization. Using

dozens of case studies, shows how to create or dominate new categories or subcategories, making competitors irrelevant Shows how to manage the new category or subcategory as if it were a brand and how to create barriers to competitors Describes the threat of becoming irrelevant by failing to make what customer are buying or losing energy David Aaker, the author of four brand books, has been called the father of branding This book offers insight for creating and/or owning a new business arena.

Instead of being the best, the goal is to be the only brand around-making competitors irrelevant. **Lemon-Aid New and Used Cars and Trucks 1990–2015** John Wiley & Sons Successful interaction with products, tools and technologies depends on usable designs and accommodating the needs of potential users without requiring costly training. In this context, this book is concerned with emerging ergonomics in design concepts, theories and applications of human factors knowledge focusing

---

on the discovery, design and understanding of human interaction and usability issues with products and systems for their improvement. This book will be of special value to a large variety of professionals, researchers and students in the broad field of human modeling and performance who are interested in feedback of devices' interfaces (visual and haptic), user-centered design, and design for special populations, particularly the elderly. We hope this book is informative, but even more - that it is

thought provoking. We hope it inspires, leading the reader to contemplate other questions, applications, and potential solutions in creating good designs for all.

This book results from a conference held in Singapore in September 2009 that brought together distinguished lawyers and economists to

examine the differences and similarities in the intersection between intellectual property and competition laws in Asia. The prime focus was how best to balance these laws to improve economic welfare. Countries in Asia have different levels of development and experience with intellectual property and competition laws. Japan has the longest experience and now vigorously

enforces both competition and intellectual property laws. Most other countries in Asia have only recently introduced intellectual property laws (due to the Trade-Related Aspects of Intellectual Property Rights (TRIPS) Agreement) and competition laws (sometimes due to the World Bank, International Monetary Fund or free trade agreements). It would be

---

na ï ve to think that laws, even if similar on the surface, have the same goals or can be enforced similarly. Countries have differing degrees of acceptance of these laws, different economic circumstances and differing legal and political institutions. To set the scene, Judge Doug Ginsburg, Greg Sidak, David Teece and Bill Kovacic look at the intersection of intellectual

property and competition laws in the United States. Next are country chapters on Asia, each jointly authored by a lawyer and an economist. The country chapters outline the institutional background to the intersection in each country, discuss the policy underpinnings (theoretically as well as describing actual policy initiatives),

analyse the case law in the area, and make policy prescriptions. Fuel Economy Guide AHFE International (USA) The A-904 and A-727, debuting in 1960 and 1962, respectively, are 3-speed automatic Chrysler TorqueFlite Transmissions. In Mopar circles, they have become synonymous with strength, durability, and performance. In fact, 43 years after its first application, A-904s were still found in the Jeep lineup!

---

TorqueFlites are known for their dependability, but many have endured a tremendous amount of abuse over 50-plus years when hooked up to V-8 Mopar powerplants. There is little doubt that some of these automatics could be prone to failure, or at least need a thorough rebuild. Tom Hand shares his decades of experience rebuilding TorqueFlite transmissions with chapters dedicated to troubleshooting, disassembly and reassembly, performance modifications,

post-installation procedures, and the most thorough source guide offered in print, ever. The author walks you through the TorqueFlite rebuild with color photos showcasing step-by-step procedures with highly detailed, easy-to-follow text. devices to notice. Information technology has improved rapidly, but there is no reason why progress should be limited to computers or Silicon Valley. Progress can be achieved in any industry or area of business. It comes from the most important skill that every leader must master: learning to think for yourself. Doing what someone else already knows how to do takes the world from 1 to n, adding more of something familiar. But when you do something new, you go from 0 to 1. The next Bill Gates will not

build an operating system. The next Larry Page or Sergey Brin won't make a search engine. Tomorrow's champions will not win by competing ruthlessly in today's marketplace. They will escape competition altogether, because their businesses will be unique. Zero to One presents at once an optimistic view of the future of progress in America and a new way of thinking about innovation: it starts by learning to ask the questions that lead you to find value in unexpected places.

*Profitable Customer Engagement* is an authoritative book that communicates the fundamentals of profitable customer engagement by proposing a customer engagement value (CEV) framework. It is a first-of-its-kind book that outlines the methods of engaging customers profitably in business-to-consumer as well as business-to-business settings. The book offers firms with definitions of the metrics within the CEV framework, and the ways to measure and maximize these

metrics that can help in engaging customers profitably. The interrelationships between these metrics, i.e., how each metric impacts the other, are also explained in detail with real-life examples. *I-Bytes Automotive Industry Motorbooks* As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, *Lemon-Aid Used Cars and Trucks 2011/2012* shows buyers how to pick the cheapest and most reliable vehicles from

Rosenfeld Media Antistatic sprays from several different

manufacturers are examined. The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum

surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. Information on some of the properties of some antistatic

It has been decades since

many business schools outside India adopted the case study methodology for teaching almost all branches of management studies. This trend has been seen in India, too, where top management institutes have implemented the case study-based methodology as an important pedagogical tool in business education. The major issue in India, however, is a severe shortage of Indian case studies through which business schools can provide industry insights to students. This volume fills that gap. It has twenty

---

Indian cases related to different aspects of business management. The cases cover some of the prominent disciplines of management like marketing, finance, human resource management, strategy management, operations management, accounting, and mergers and acquisitions. These cases best serve the purpose of adoption of 'case methodology' in classroom teaching or online lecture sessions for the faculty and students of business management.
