Prentice Hall  
The Use of Locks in Physical  
Crime Prevention aims to present  
the minimum necessary material

that will enable the proper use of locks as security devices. The lock is the most widely used security device. Wherever people have an interest in securing their persons or property against intruders, some sort of locking devices have been developed and used. The effectiveness of any locking system depends on a combination of interrelated factors that are involved in the design, manufacture, installation, and maintenance of the system. A security specialist needs to understand the weaknesses and strengths of the various systems, and know how each must be used to achieve maximum benefit from its application. This goal requires a thorough understanding of the inner workings of the various types of locks, which this book presents. This book is presented in layman's language and does not require an extensive background in security. However, the technological detail contained in this book will be of use to professionals in the field.

The Industrial Revolution

began in America in Pawtucket, Rhode Island at the Slater Mill in 1793 where water power was first harnessed for factory work, and where Sam Patch went to work as a child early in the 19th Century. Very little is known of the real man, except that he began leaping from the roof of the mill into the Blackstone River and after that there was no stopping him as he jumped from ships' masts, bridges, and over cataracts, including Niagara Falls. This novel places him at a time of early American expansion to

the West, when the Erie Canal first opened, and imagines his life in the mills, his heroic dreams of wealth and fame, his love for a Native American woman, and his inexorable rush to an early and spectacular death.

### Managing Marketing in the 21st Century

John Wiley & Sons  
This reader-friendly marketing book conveys timely and relevant material in a dynamic presentation of how marketing concepts are implemented, and what they mean in the marketplace. It introduces marketing from the perspective of real people making real marketing decisions at leading companies every day. Learners will come to understand that marketing is about creating value for customers, for companies, and for society as a whole-and they will see how that is accomplished in the real world. A five-part organization covers making marketing value decisions, identifying markets and understanding customers' needs for value, creating the value proposition, communicating the value proposition, and delivering the value proposition. For individuals interested in a career in marketing.
