In the music industry, the days of deals in smoke-filled back rooms are all but over. Artist development happens on the streets, not at major labels. And the old-school "professional" managers are stepping down, one by one, to cozy retirements funded by decades of commissions from successful clients. With fewer and fewer "lifers" available to take on new clients, what's an emerging artist to do? Likewise, how does an aspiring artist manager get a start without the connections and influence required of their predecessors? Music business manager and consultant Joe Taylor Jr. set out to answer these questions for a member of his staff. The result? Over 160 pages of nuts-and-bolts advice for the novice music manager, or for any musician looking to boost their success team by adding homegrown management to the mix.

The promise of "green jobs" and a "clean energy future" has roused the masses. But as Robert Bryce makes clear in this provocative book, that vision needs a major re-vision. We cannot--and will not--quit using carbon-based fuels at any time in the near future for a simple reason: they provide the horsepower that we crave. The hard reality is that oil, coal, and natural gas are here to stay. Fueling our society requires that we make good decisions and smart investments based on facts. In Power Hungry, Bryce crushes a phalanx of energy myths, showing why renewables are not green, carbon capture and sequestration won't work, and even--surprise!--that the U.S. is leading the world in energy efficiency. Power Hungry delivers a clear-eyed view of what's needed to transform the gargantuan global energy sector.
