This report serves as a "how to" guide for corporate decision makers as they navigate rapidly-changing global markets. The report presents an in-depth look at the development and implementation of corporate strategies that take into account climate-related risks and opportunities. The report is comprised of two main sections: 1. The Synthesis Report lays out a step-by-step approach for incorporating climate change into corporate strategies and is primarily based on results from a 100-question survey completed by 31 companies. 2. The Case Studies section features the lessons learned at each step of the strategy

development process by these six companies: Cinergy (now Duke Energy), Swiss Re, DuPont, Alcoa, The Shell Group, Whirlpool Corporation.

information on the Internet. Land Rover Discovery 95/98 Prestel "Takes a close look at people's involvement in the new framework of state decentralization. By focusing on the potential as well as the limitations of citizens managing local budgets, the goal is to improve the process of democratization of the state and society. The contributors explore the achievements of the process of decentralization, which is the backdrop for the emerging process of citizen participation in public decisionmaking at the local government level. The volume approaches this issue from a general perspective and up close through case studies. The broad perspective

generates a framework for analytical understanding of fiscal decentralization and participation. The case studies highlight local experiences in East Asia - Indonesia, Malaysia, and the Philippines - and Latin America - Bolivia, Brazil, Colombia, and Peru. Each case illustrates a particular leadership style and type of participation. Important similarities emerge in the areas of trust, political will, unity among actors, intergovernmental coordination, capacity of government and citizen organizations to generate participatory public policies, and redistribution of power and responsibility between the state and civil society."--Publisher's

"The risk of engine
failure is greatest
when your engine is
young, NOT when it's
old. You should worry
more about pediatrics
than geriatrics." -Mike
Busch A&P/IA Mike
Busch on Engines
expands the
iconoclastic philosophy
of his groundbreaking
first book Manifesto to
the design, operation,
condition monitoring,
maintenance and

troubleshooting of
piston aircraft engines.
Busch begins with the
history and theory of
four-stroke spark-
ignition engines. He
describes the
construction of both the
"top end" (cylinders)
and "bottom end"
(inside the case), and
functioning of key
systems (lubrication,
ignition, carburetion,
fuel injection,
turbocharging). He
reviews modern engine
leaning technique
(which your POH
probably has all
wrong), and provides a
detailed blueprint for
maximizing the life of
your engine. The
second half presents a
21st-century approach
to health assessment,
maintenance, overhaul

and troubleshooting. Busch explains how modern condition monitoring tools-like borescopy, oil analysis and digital engine monitor data analysis-allow you to extend engine life and overhaul strictly on-condition rather at an arbitrary TBO. The section devoted to troubleshooting problems like rough running, high oil consumption, temperamental ignition and turbocharging issues is worth its weight in gold. If you want your engine to live long and prosper, you need this book.
