Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation). Many 2011-12 automobiles have "chin-to-chest head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway." Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers. GM's 2012 Volt electric car is a mixture of hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago. You can save \$2,000 by cutting freight fees and "administrative" charges. Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea. South Korea's amazing rise from the ashes: the inside story of an economic, political, and cultural phenomenon. Long overshadowed by Japan and China, South Korea is a small country that happens to be one of the great national success stories of the postwar period. From a failed state with no democratic tradition, ruined and partitioned by war, and sapped by a half-century of colonial rule, South Korea transformed itself in just fifty years into an economic powerhouse and a democracy that serves as a model for other countries. With no natural resources and a tradition of authoritarian rule, Korea managed to accomplish a second Asian miracle. Daniel Tudor is a journalist who has lived in and written about Korea for almost a decade. In *Korea: The Impossible Country*, Tudor examines Korea's cultural foundations; the Korean character; the public sphere in politics, business, and the workplace as well as the family, dating, and marriage. In doing so, he touches on topics as diverse as shamanism, clan-ism, the dilemma posed by North Korea, the myths about doing business in Korea, the Koreans' renowned hard-partying ethos, and why the infatuation with learning English is now causing massive social problems. South Korea has undergone two miracles at once: economic development and complete democratization. The question now is, will it become as some see Japan, a prosperous yet aging society, devoid of energy and momentum? Or will the dynamism of Korean society and its willingness to change—as well as the opportunity it has now to welcome outsiders into its fold—enable it to experience a third miracle that will propel it into the ranks of the world's leading

nations regarding human culture, democracy, and wealth? More than just one journalist's account, *Korea: The Impossible Country* also draws on interviews with many of the people who made South Korea what it is today. These include: Choi Min-sik, the star of "Old Boy"; Park Won-soon, Mayor of Seoul; Soyeon Yi, Korea's first astronaut; Hong Myung-bo, legendary captain of Korea's 2002 FIFA World Cup team; Shin Joong-hyun, the 'Godfather of Korean Rock.' Ko Un, poet; Hong Seok-cheon, restaurateur, and the first Korean celebrity to 'come out.' And many more, including a former advisor to President Park Chung-hee; a Shaman priestess ('mudang'); the boss of Korea's largest matchmaking agency; a 'room salon' hostess; an architect; as well as chefs, musicians, academics, entrepreneurs, homemakers, and chaebol conglomerate employees.

Cost, Effectiveness, and Deployment of Fuel Economy Technologies for Light-Duty Vehicles Haynes Manuals N. America, Incorporated

This study investigates the controversial motion pictures written and directed by the independent filmmaker Kim Ki-duk, one of the most acclaimed Korean auteurs in the English-speaking world. Propelled by underdog protagonists who can only communicate through shared corporeal pain and extreme violence, Kim's graphic films have been classified by Western audiences as belonging to sensationalist East Asian "extreme" cinema, and Kim has been labeled a "psychopath" and "misogynist" in South Korea. Drawing upon both Korean-language and English-language sources, Hye Seung Chung challenges these misunderstandings, recuperating Kim's oeuvre as a therapeutic, yet brutal cinema of Nietzschean resentment (political anger and resentment deriving from subordination and oppression). Chung argues that the power of Kim's cinema lies precisely in its ability to capture, channel, and convey the raw emotions of protagonists who live on the bottom rungs of Korean society. She provides historical and postcolonial readings of victimization and violence in Kim's cinema, which tackles such socially relevant topics as national division in Wild Animals and The Coast Guard and U.S. military occupation in Address Unknown. She also explores the religious and spiritual themes in Kim's most recent works, which suggest possibilities of reconciliation and transcendence.

America, Incorporated The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards.
