For the Major and his wife Edelgard, the idea of a caravanning holiday in Southern England seems perfect. As they begin their leisurely progress through its green and verdant countryside, the holiday spirit sets in. But England presents more than just a contrast of scenery to this German couple- amongst the company of their English companions Edelgard seems to undergo a change of temperament, revealing herself to be far less biddable than the upright Major had believed. The blossoming of the hedgerows is one thing, but the blossoming of his wife is quite another. ... [From synopsis on abebooks.com website, 24 July 2002]. The Fox and the Stork Aletti Editore

### The Caravaners Routledge

In real life, Mitchell Stevens is a professor in bustling New York. But for a year and a half, he worked in the admissions office of a bucolic New England college that is known for its high academic standards, beautiful campus, and social conscience. Ambitious high schoolers and savvy guidance counselors know that admission here is highly competitive. But creating classes, Stevens finds, is a lot more complicated than most people imagine. Admissions officers love students but they work for the good of the school. They must bring each class in "on budget," burnish the statistics so crucial to institutional prestige, and take care of their colleagues in the athletic department and the development office. Stevens shows that the job cannot be done without "systematic preferencing," and racial affirmative action is the least of it. Kids have an edge if their parents can pay full tuition, if they attend high schools with exotic zip codes, if they are athletes--especially football players--and even if they are popular. With novelistic flair, sensitivity to history, and a keen eye for telling detail, Stevens explains how elite colleges and universities have assumed their central role in the production of the nation's most privileged classes. Creating a Class makes clear that, for better or worse, these schools now define the standards of youthful accomplishment in American culture more

generally.

### Embodied in Love Bloomsbury Publishing

La linea del 20 — in questa edizione rinnovata nella veste grafica e arricchita di cornicette per divertire i bambini e facilitare l'apprendimento — è lo strumento, alternativo ai regoli colorati, per apprendere i numeri e il calcolo nella scuola primaria e nella fase di preparazione svolta nella scuola dell'infanzia. Valorizza le capacità intuitive di ciascun bambino, che nasce — secondo recenti studi — con una spiccata propensione verso il calcolo di numerosità e giunge a scuola carico di informazioni sui numeri e di voglia di apprendere. Rispetto ai regoli colorati che presuppongono un lungo percorso di istruzioni, la linea del 20 può essere

usata immediatamente, con gioia e stupore. Consente di operare da subito entro il 20 svolgendo addizioni e sottrazioni, che prima di essere algoritmi della disciplina sono azioni della vita quotidiana che hanno il semplice significato di «aggiungere» e «togliere». Gli alunni riconoscono lo strumento come rappresentazione delle proprie mani e non occorrono spiegazioni, perché sono proprio le mani lo strumento naturale che ha permesso l'evoluzione del calcolo mentale. Nel testo, accanto a una breve guida al quaderno operativo, viene presentato un itinerario didattico completo per lo svolgimento del programma di classe prima comprendendo le abilità di calcolo e i problemi aritmetici, sempre secondo il metodo analogico. La linea del 20 è consigliata in particolare per gli alunni in difficoltà nel calcolo a mente e si rivela molto utile con quelli ipovedenti o ipoacusici, oltre che con alunni stranieri con difficoltà linguistiche. Può inoltre rivelarsi un supporto ideale per i genitori che vogliono sperimentare un apprendimento precoce del figlio in un quadro di valorizzazione prescolastica delle sue piene potenzialità.
